

Moving data. Powering your Azure Data Lake Storage (ADLS) Data Lake.

Automate your data lake management with Fivetran Managed Data Lake Service

With the ability to land over 700 pre-built or custom data sources into **Microsoft Azure Data Lake Storage (ADLS) Data Lake**, Fivetran automatically normalizes, compacts and deduplicates your data before standardizing it in Delta Lake table format. From securely and reliably moving data into ADLS, to continuous table maintenance and updates, Fivetran automates your data lake management.

Standardize

Automatically convert your data to a standardized, open table Delta Lake format that provides ACID transactions, tools for data quality, GDPR compliance and more.

Automate

Optimize developer time by outsourcing tedious data management — including CDC, normalization and data pruning — ensuring your data is up to date and ready to query at all times.

Connect

Connect over 700 data sources in just minutes. Industry-leading uptime, compliance and security guarantees safeguarded sensitive data.

Powering data movement for Microsoft Azure Data Lake Storage
