

Fivetran Trial Checklist

14 days of free data movement for every source to any destination to power your every innovation. Here's how to get the most out of your free trial.

Project costs based on actual usage

Test our Enterprise-tier features

Visualize and share your data

Action Item	Benefit	Resources
1. Connect all of your sources before syncing data	Your trial begins once an initial sync completes, so be sure to connect all of your sources before starting one.	See whether Fivetran supports your data sources or set up a connection using the Connector SDK .
2. Add key data users	Allow additional users to connect their sources and gain data visibility, without over-permissioning.	Add new users or learn about role-based access control .
3. Get your infosec team up to speed	Facilitate your security review by studying our features and reaching out to a specialist.	Read our security white paper or talk to a security specialist .
4. Automate your transformations	Accelerate your time-to-insight by orchestrating your model runs with Fivetran Transformations for *dbt Core.™	Explore our supported data models or learn about Fivetran Transformations for *dbt Core.™
5. Get a usage-based pricing estimate	Seven days after your initial sync, view your usage and get a cost estimate.	Go to your billing page or learn about Fivetran pricing .
6. Lean into our expertise	Our team of ELT experts can show you how to set up your stack, solve complex data needs, and more.	Start a chat here and we'll connect you with an expert
