

BRISK BOOST

Turn any resource into an interactive
AI-powered learning experience

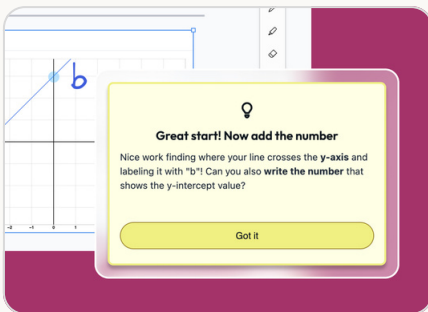

WHAT IS BRISK BOOST?

Brisk Boost helps you transform any article, document, video, or website into a **safe AI learning experience** in seconds.

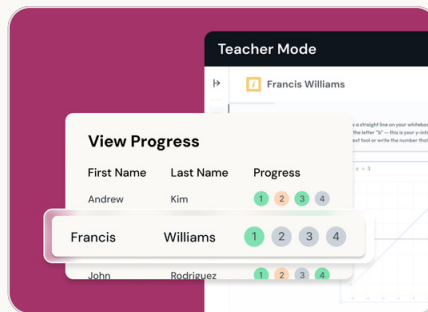

Students get the chance to engage in **dynamic, interactive activities** that build confidence, critical thinking, and digital literacy. You get **real-time data** on student strengths and learning gaps and recommendations for next steps.

WHY TEACHERS CHOOSE BOOST

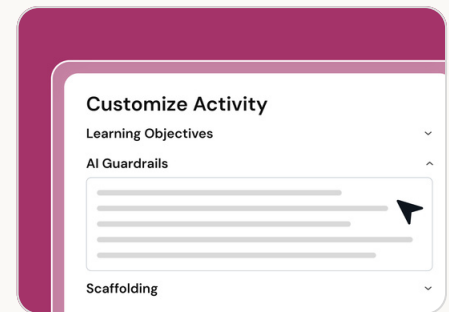

AI that helps students learn, not just find answers

Boost activities can take many shapes, from character chats and debates to math word problems and writing coach sessions. They let students explore new ideas, demonstrate understanding, and express thinking visually.

Real-time progress tracking and clear reporting

Boost activities let you track student progress in real time so you can see who's engaged and who's stuck. Then, Boost Learning Insights show you where students excelled, where they need reinforcement, and what you should teach next.

Comprehensive AI safety and privacy controls

Brisk gives you the ability to set custom learning objectives, scaffolding, and AI guardrails for every Boost activity. The SOC 2-, FERPA-, and COPPA-compliant technology that powers Boost prioritizes student safety and privacy.
