

BRISK INTELLIGENCE

AI that understands your curriculum and instructional priorities

Adopted curriculum doesn't always show up in the classroom. That's because **most AI tools don't distinguish between vetted materials and random resources**, so teachers have to adapt every AI output by hand with little support or structure.

Unlike these other tools, Brisk delivers AI that actually **uses your curriculum and instructional priorities as a starting point** for everything it creates.

Tools & Resources Built for Your District, Not Every District

Curriculum Intelligence

See your curriculum reflected in everything Brisk creates

FOR LEADERS

Drive curriculum fidelity across your district by giving teachers tools that automatically align their resources with your scope, sequence, and pacing.

FOR TEACHERS

Generate differentiated teaching materials, scaffolds, and assessments in seconds without having to repeatedly explain what you need to be teaching when.

District Guidance

Take your instructional philosophy from theory to practice

Use what matters to your district — pedagogical frameworks, Portrait of a Learner competencies, priority standards — to provide structure for teachers' AI usage.

Make sure everything you've learned during professional development shows up automatically in the resources you build with Brisk — no second thought required.

District Library

Work from a shared collection of approved resources

Promote instructional consistency by building bundles of lesson-specific resources based on pre-existing materials or Brisk's smart recommendations.

Spend less time looking for the right resource and more time supporting student learning with leader-approved teaching materials right at your fingertips.

GETTING STARTED WITH BRISK INTELLIGENCE

1

Leaders select curriculum and set priorities

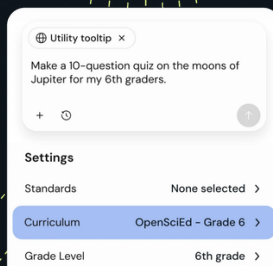

Choose a pre-built Brisk Ready Curriculum or upload your own. Then, set custom guidance and guardrails based on your instructional priorities.

Brisk Ready Curriculum

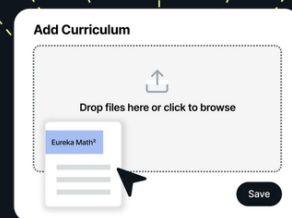

These pre-built options align to all major curricula for ELA, Math, Science, and Social Studies. Ready on day one, no district setup required.

Reach out to learn which curricula are already supported.

Custom Curriculum Upload

Upload materials directly into Brisk as PDFs, Google Drive files, or OneDrive files, just like you'd store and distribute curriculum via your LMS.

**2**

Brisk builds your district's AI engine

Brisk combines your curriculum selection, standards, and guidance into a resource-generation engine that meets your unique needs.

3

Teachers create aligned resources in seconds

When teachers use Brisk, your custom engine will work behind the scenes to make sure any new resource reflects your curriculum and priorities.
