

Brisk For English Language Learners

Make sure every student gets the support they need

AI That Makes Differentiation Possible

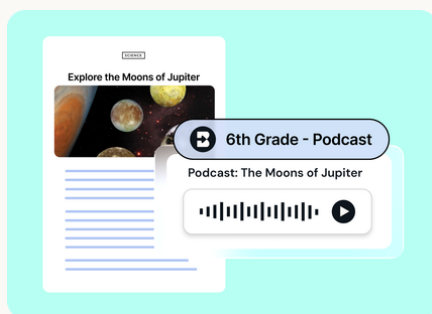

Brisk helps you **meet the needs of multilingual learners** by making it easy to translate resources, scaffold complex texts, and create hands-on activities.

With Brisk, your go-to materials become differentiated, accessible learning experiences in seconds, leaving you **more time for face-to-face work with students**.

Make learning materials accessible

Meeting students where they are is essential to driving achievement. Brisk lets you translate and adjust the reading level of resources, build vocabulary supports and other scaffolds, and generate exemplars that clarify expectations.

Cater to each student's learning style

Different students prefer to learn in different ways. Brisk makes it easy to embrace this variety by creating visual aids, podcasts, and interactive activities that show you how students actually think — not just their answers.

Provide feedback students can apply

Students need frequent, actionable feedback in order to grow. Brisk helps you generate clear, specific comments in a student's first language, ensuring multilingual learners are able to understand and apply your valuable input.

The Tools You Need For Inclusive Instruction

Brisk Tool

Instructional Task

Text Translation

Translate texts into 50+ languages to make resources accessible for multilingual learners.

Change Reading Level

Adjust the reading level of any text instantly, whether it's a Google or Word Doc, PDF, webpage, image, or video transcript.

Podcast Generator

Create audio content (and accompanying transcripts) in 50+ languages to support students with varying learning styles.

UDL Lesson Plan

Put together Universal Design for Learning-aligned lesson plans that support all learners, complete with guidance on representation, expression, engagement, and assessments.

Brisk Boost

Create structured, interactive AI learning experiences that provide students with personalized feedback, vocabulary support, and writing guidance.

Create Anything

Generate any lesson or activity you can dream up, complete with built-in scaffolds and customizations that speak to unique student needs and interests.
