I saw a great *Forbes* article recently that reinforced the fragility of forecasting using a quarter-century-old anecdote about the Pentagon changing the way they identify future threats. The change stemmed from a review of how quickly the geopolitical landscape evolves—yesterday's adversaries can become tomorrow's allies. Rather than focusing on one specific forecast, it was more prudent to be prepared for all possible outcomes.

This echoes what we often say at Dimensional: Plan, don't predict. We all have views about what the future may bring: companies that will succeed, economies that will grow, markets that will take off. Markets set prices based in part on the aggregate of these expectations. So, market prices already represent a forecast of the future. However, some investors may let their personal forecasts drive their asset allocation decisions. Dogmatic adherence to forecasts dictates concentrated investments that fall short in the event the future differs from our predictions. Diversifying portfolios is a tacit admission that we don't have a crystal ball. You reduce the range of outcomes by preparing for what you can't see coming.

Country stock market returns are a good example of this. Going all-in on one country because you have a view on where their stocks are headed opens you up to a wide range of outcomes. The average difference between the best- and worst-performing developed market countries over the past two decades was over 50 percentage points. Get your call right, and you'll look like a hero. Get it wrong, and you'll be as apoplectic as when Chevy Chase's character loses the rock paper scissors game in *Vegas Vacation.*

The Future Is Unknown, So Plan Accordingly

This information is not meant to constitute investment advice, a recommendation of any securities product or investment strategy (including account type), or an offer of any services or products for sale, nor is it intended to provide a sufficient basis on which to make an investment decision. Investors should consult with a financial professional regarding their individual circumstances before making investment decisions.

The information in this material is intended for the recipient's background information and use only. It is provided in good faith and without any warranty or representation as to accuracy or completeness. Information and opinions presented in this material have been obtained or derived from sources believed by Dimensional to be reliable, and Dimensional has reasonable grounds to believe that all factual information herein is true as at the date of this material. It does not constitute investment advice, a recommendation, or an offer of any services or products for sale and is not intended to provide a sufficient basis on which to make an investment decision. Before acting on any information in this document, you should consider whether it is appropriate for your particular circumstances and, if appropriate, seek professional advice. It is the responsibility of any persons wishing to make a purchase to inform themselves of and observe all applicable laws and regulations. Unauthorized reproduction or transmission of this material is strictly prohibited. Dimensional accepts no responsibility for loss arising from the use of the information contained herein.

This material is not directed at any person in any jurisdiction where the availability of this material is prohibited or would subject Dimensional or its products or services to any registration, licensing, or other such legal requirements within the jurisdiction.

"Dimensional" refers to the Dimensional separate but affiliated entities generally, rather than to one particular entity. These entities are Dimensional Fund Advisors LP, Dimensional Fund Advisors Ltd., Dimensional Ireland Limited, DFA Australia Limited, Dimensional Fund Advisors Canada ULC, Dimensional Fund Advisors Pte. Ltd., Dimensional Japan Ltd., and Dimensional Hong Kong Limited.

RISKS

Investments involve risks. The investment return and principal value of an investment may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original value. Past performance is not a guarantee of future results. There is no guarantee strategies will be successful.

Diversification neither assures a profit nor guarantees against loss in a declining market.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.
Investment products: • Not FDIC Insured • Not Bank Guaranteed • May Lose Value
Dimensional Fund Advisors does not have any bank affiliates.
