Pipco Class A CDL Driver Job Description

Position Summary

Responsible for the safe and timely transportation of refrigerated and dry freight while complying with DOT regulations, company policies, and customer requirements throughout the service region.

Service Region

Drivers operate throughout the Eastern and Midwestern United States, primarily from Maine (ME) through South Carolina (SC) and west to Illinois (IL). Overnight travel and multi-day trips are required.

Reefer Operations

Safely transport temperature-controlled produce and food products. Monitor reefer settings, fuel levels, temperature compliance, and maintain accurate temperature records when required.

Responsibilities

- Safely operate Class A commercial vehicles.
- Conduct pre-trip and post-trip inspections.
- Ensure freight is loaded, secured, and delivered in good condition.
- Maintain all required shipping documents and logs.
- Communicate delays, service issues, and ETA changes promptly.
- Comply with FMCSA, DOT, HOS, and company safety requirements.
- Monitor and manage refrigerated trailer temperatures and reefer fuel levels.

Qualifications

- Valid Class A CDL.
- Minimum experience operating tractor-trailers preferred.
- Ability to pass DOT physical and drug screening.
- Knowledge of Hours of Service regulations.
- Strong communication and customer service skills.
- Experience hauling refrigerated freight preferred.
