

SING KING

BETA LAB Instructions

Welcome friend. Glad you're here.

The Beta Lab is where the Sing King Game gets poked, prodded, broken and fixed.
You're getting in first, and set up takes about two minutes.
Here's how...

What you'll need.

- An iPhone or iPad running iOS 16 or later, or an Android device
Not sure? Settings > General > About > Software Version.
- The Apple Account you normally use for the App Store.
- Two minutes. That's honestly it.

IPHONE?

1 Grab TestFlight

TestFlight is Apple's own app for testing apps before they go public. It's free, it's official, and it's the only way onto the iOS Beta.

1. Open the App Store.
 2. Search TestFlight.
 3. Tap Get.
- 
- 

2 Tap your invite link

Your Beta Lab link: [CLICK HERE](#)

Important: tap the link on the iPhone or iPad you want to play on. Tapping it on a laptop will just show you a webpage and a bit of confusion.

Accept, install, sing!

3

1. Tap Accept.
2. Tap Install.
3. Tap Open.

Done! You're officially in the Beta Lab. You'll notice a little orange dot next to the app on your home screen. That's your Beta Badge. Wear it with pride.

Turn on automatic updates

4

We'll be shipping new builds regularly

1. Open TestFlight.
2. Tap Sing King Game.
3. Under App Information, flip Automatic Updates to On.

New builds now install themselves and you'll get a notification each time.

ANDROID?

1

Download Link

Tap your Beta Lab download link on your Android phone:

[ANDROID DOWNLOAD LINK](#)

2

Allow the install

Android will ask whether to allow installs from your browser. Tap Settings, switch on 'Allow from this source', then head back.

3

Accept, install, sing

Tap the downloaded file to install, then open the game.

TELL US EVERYTHING!

You're not just playing early, you're telling us what's broken, what's boring and what's brilliant.

Fastest way, straight from the game:

1. Take a screenshot while you're in the Sing King Game.
2. Tap the little thumbnail in the bottom-left corner.
3. Scribble on it if you want to point at something specific, then tap "Done".
4. Add a comment and send over to us!

Or through TestFlight:

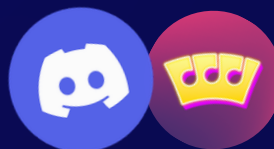

1. Open TestFlight and tap Sing King Game.
2. Tap Send Beta Feedback.
3. Attach a screenshot if it helps, write your thoughts, tap Submit.

If it crashes, you'll get a prompt asking if you want to send us the crash report. Please tap Share. Crash reports are weirdly useful and we love them.

Come and talk to us on Discord.

Head to the [Games Center in our Discord server](#), where the rest of the Beta Lab hangs out. Honestly, that's usually the [fastest way to get a reply](#), and you'll often [find someone's already hit the same thing](#).

[Join us on Discord](#)

Prefer email?

hello@singingkaraoke.com works too.

No feedback is too small. "This button feels weird" is a real, useful thing to tell us.

BETA LAB HOUSE RULES

General Housekeeping

- Builds **expire after 90 days**. If the game stops opening, just install the latest build from TestFlight.
- **Up to 30 devices** on the same Apple Account, if you want it on your phone and your iPad.
- Anything you buy in the beta is free and won't carry over to the public version later.
- Joining by **public link keeps you anonymous**. We can see session counts, crashes, install date and which build you're on. **We can't see your name or email unless you give it to us in feedback**.
- The **beta replaces the App Store version** of the game if you already have it installed.
- Things will break. That's the point. **Please tell us** when they do rather than quietly rage-quitting.

When Something Goes Wrong

- *"This beta isn't accepting any new testers right now."* Slots are full or the link is paused. **Give us a shout in the Games Centre on Discord** and we'll get you sorted.
- The link just opens a webpage. Install TestFlight first, and make sure you're **tapping the link on your iPhone or iPad** rather than a computer.
- *"Requires a newer version of iOS."* Settings > General > Software Update, then try the link again.
- **The game won't open** and says the build expired. Open TestFlight and **install the newest build**.
- **Something else** entirely. Games Centre on **Discord**, or **hello@singingkaraoke.com**. We'd rather hear about it than have you stuck.
