WORKPLACE FIRST AID

Compact First Aid Cabinet

FAC-1300

Most first aid cabinets are either overstuffed with name-brand medicines or barren except for expired bandages. Redicare cabinets are different: standardized, organized, and stocked with a clear layout that makes sense in a hurry. They meet and exceed ANSI Class B requirements, but over half of what's inside is there because of real-world feedback, not just bureaucracy.

Our included monthly service keeps your cabinet fully stocked and ready for everything from headaches to critical injuries, automatically replenishing any used supplies. If an emergency depletes your inventory, we will be on-site within two business days to restore the cabinet to a brand-new state and keep your safety net intact at no extra cost.

Features:

- OSHA/ANSI Z308.1-2026 compliant for Class B first aid kits
- Non-drowsy, single-dose OTC medications
- Identical layouts across all 3-shelf models for enterprise consistency and a faster response
- Bloodborne Pathogens and Overdose Kits
- Overdose Kit with 2 doses of nasal spray naloxone
- Includes 100 count anti-fog lens wipes
- Wall-mounted, durable, and highly visible industrial cabinet

Our Service Includes:

- Routine inspection at least monthly
- Replenishment of all depleted, expired, or soiled products
- Restoration of the cabinet to its original, just-installed condition
- Provision of an updated Certificate of Compliance after every inspection
- All standard supply refills covered under a single, predictable flat rate
