WORKPLACE FIRST AID

Responder Bag

FAB-2300

First aid emergencies don't always happen near your cabinet. Our grab-and-run Responder Bag was designed in consultation with paramedics to bring everything necessary to respond. It contains clearly labeled kits for a range of crises, including bleeding, choking, overdose, and diabetic emergencies. Each kit is put together for any bystander to use, regardless of training.

Monthly service is included and keeps your responder bag prepared and stocked with fresh supplies. If it's used in an emergency, we'll be on-site within two business days to replenish used modules at no extra cost and make sure you're covered for your next bad day.

Features:

- 12 specialized modules
  - ✔ Allergic Reaction Response
  - ✔ Bleeding Control
  - ✔ Burn Care
  - ✔ Choking Response
  - ✔ Cleanup
  - ✔ Diabetic Emergency Response
  - ✔ Eye Injury Care
  - ✔ Fracture Care
  - ✔ Heart Attack Response
  - ✔ Minor Wound Care
  - ✔ Opioid Overdose Response
  - ✔ Resuscitation
- Includes vital signs monitoring tools to aid 911 dispatchers before EMS arrives
- Integrated QR codes for faster incident reporting from the scene
- Tamper seal ensures contents are ready to use

Our Service Includes:

- Routine inspection at least monthly
- Replenishment of all depleted, expired, or soiled products
- Restoration of the bag to its original, just-installed condition
- Provision of an updated Certificate of Compliance after every inspection
- All standard supply refills covered under a single, predictable flat rate
