redicare®
First minutes count.

Redi365

Most first aid gaps aren't discovered until something forces the question: an audit, a new manager, or an emergency. **Redi365 puts your whole program in one place so you find them first.** Your live RediScore shows the status of your program with one number from 0 to 100. Behind it are complete service records with photos and timestamps from every visit, certification tracking, your evacuation plan, incident reporting, and in-depth equipment training for your team.
So when the question comes, you already have the answer.
