Acres of Paradise is a 58-site, 15.2-acre all age manufactured home community development opportunity, located in Paradise, Butte County, CA, and offered at \$1,050,000 with seller financing. The Property has an active permit to operate and is HCD-permitted for 53 manufactured home sites and 5 RV sites with drain, providing for a predominantly long-term community with the RV component offering income diversification. Substantial engineering, design, and utility work has already been completed, reducing a new owner's timeline to accepting residents. The Property is offered with attractive seller financing terms of 25% down payment and 6.00% interest only rate over a five-year term with no prepayment penalty. This structure is intended to provide runway for the buyer to obtain final approvals, develop sites, remaining infrastructure, and in-fill the community. Comparable manufactured home communities in Paradise command space rents averaging \$582 per month and are achieving average occupancy of 88%, supporting the income potential of the completed community. The offering price of \$1,050,000 for Acres of Paradise MHP equates to \$18,103 per site and \$69,079 per acre. Comparable manufactured home community development opportunities in Paradise, CA with gas and electric installed have traded for an average of \$21,589 per site and \$152,917 per acre. The property's pricing equates to a 16% discount to the comparable average price per site and 55% discount to the comparable average price per acre, offering an attractive investment basis. Pre-development is in its final stages; the mobile home park site design and septic system engineering are complete, and PG&E has already installed new electric and gas lines and connections for direct-billed utilities. The septic system has been engineered as a wastewater treatment system consisting of one lift station, one 15,000-gallon tank, and leach lines located in the lower southeast portion of the Property. Public water service is available through Paradise Irrigation District. Water service is currently active, the city meter is operational, and the Town of Paradise has approved the initial plans. The current owner has completed all debris removal work and has engineered the unit layout, fire hydrant installation, grading, communication utility infrastructure, retaining wall, storm drain, erosion control, tree planting, and irrigation improvements, which are ready to submit for HCD approval. Following the 2018 Camp Fire, Paradise has experienced steady population recovery and rebuilding, while the high cost and measured pace of new single-family construction drives demand toward manufactured housing. The community sits within 7 min of retail and services in Paradise, 27 min of Chico, and 1 hour 40 min of Sacramento, with large commuter and retiree resident bases supporting long-term occupancy stability. Acres of Paradise offers a rare combination of entitled, utility-ready development and built-in seller financing!

Market Overview

MARKET OVERVIEW & LOCATION

Paradise, CA is a residential community in the Sierra Nevada foothills of Butte County, known for its scenic natural beauty and abundant outdoor recreation. The town has seen substantial rebuilding and population recovery in recent years, with thousands of new homes constructed and residents returning after the 2018 Camp Fire. Paradise is positioned within 27 minutes of Chico, 28 minutes of Oroville, and ~1.5 hours of Sacramento, providing access to major employment markets while maintaining a lower cost of living.

ECONOMIC DRIVERS & EMPLOYMENT

Paradise serves as a residential and retirement hub within the greater Chico metropolitan area. The immediate local economy is anchored by an active reconstruction sector and retail and services throughout the Skyway and Clark Road corridors. Many Paradise residents commute to Chico, which is home to California State University, Chico and healthcare systems including Enloe Health and Adventist Health Feather River's expanding outpatient and clinic services.

HOUSING DEMAND

Paradise's affordable housing inventory experiences demand generated by returning residents, a steadily rebuilding population, and a retiree and fixed-income base. A housing stock dramatically reduced by the 2018 wildfire, combined with the high cost and measured pace of new single-family construction and rising property insurance premiums, creates demand for affordable options. Mobile home communities serve as essential housing in a market where conventional supply remains constrained and affordability is key.

Paradise is in the midst of a profound municipal recovery. After the 2018 Camp Fire reduced the town's population from roughly 26,000 to fewer than 5,000, Paradise has rebuilt at a rapid pace. According to the California Department of Finance, Paradise has been the fastest-growing city in California for two consecutive years, with population climbing 9.2% year-over-year to over 10,500 residents as of January 2026. On the infrastructure side, Paradise is underway on its first-ever municipal sewer system, with design of the wastewater treatment facility underway as of early 2026 and construction slated to begin in 2028. The Paradise sewer project is explicitly intended to bring back commercial businesses and enable denser residential development in the town. Rising construction costs and elevated insurance premiums have priced many returning households out of site-built homes, while the broader Butte County market remains tight (Chico multifamily vacancy sits below 4%, with rents roughly 20% under the state average). Manufactured housing communities occupy a unique position in this market, offering the area's most attainable housing at a fraction of replacement cost, in a town projected to continue absorbing new residents for years as it rebuilds.

Utilities & Amenities

PG&E

New lines and connections have been established by PG&E for direct billed gas and electric service at each site. Existing PG&E connections will significantly reduce buyer’s timeline to accepting residents. Direct billed utilities will reduce operational burden upon project completion.

SEPTIC & WATER SYSTEM

Engineering and design have been completed for the new septic system. The system is designed as an extensive wastewater treatment system, though a buyer may explore alternative configurations. Public water service is active, and the existing meter remains operational. The system needs new private lines installed, and the Town of Paradise has approved initial plans.

HCD-PERMIT

Acres of Paradise currently has an active permit to operate and is HCD-permitted for 53 MH sites and 5 RV sites with drain, providing for a predominantly long-term community with the RV component offering income diversification.

LAND

Acres of Paradise comprises over 15 acres of land. With 58 HCD-permitted sites, the Property offers extremely low density of less than 4 sites per acre. The low site density allows for large, private lots which command premium rents. Comparable manufactured home community development opportunities in Paradise, CA with gas and electric installed have traded for an average of \$21,589 per site and \$152,917 per acre.

ENGINEERING OVERVIEW

The current owner has completed all debris removal work and has engineered the unit layout, fire hydrant installation, grading, communication utility infrastructure, retaining wall, storm drain, erosion control, tree planting, and irrigation improvements, which are ready to submit for HCD approval.
