ADDITIONAL INSTRUCTIONS
(NOT APPLICABLE FOR ALL COURT MODELS)

PACKA BOCCE

3 ADDITIONAL FIXINGS

A- In adverse weather conditions additional fixings may be necessary to secure bocce courts. Not all bocce courts come with these fixings as standard but can be purchased separately from Packaworld or your local Packaworld distributor.

Additional fixings available are:

I. For GRASS Surfaces - Place ground anchors alongside inflatable walls and attach to frame with velcro straps see fig 16. and fig 17.

II. For ASTRO TURF - Place filled water bags around base frame. For extra sturdiness the water bags can be attached to the frame by joining two velcro straps to form a long one as shown in fig 18. Additional water bags can be laid on top to secure further.

PACKABOCCE™

THESE INSTRUCTIONS HAVE BEEN DEVELOPED TO CATER FOR ALL MODELS OF PACKABOCCE COURTS. THEY AIM TO GIVE THE USER A BASIC UNDERSTANDING OF HOW TO SET UP, PACK AWAY AND SECURE COURTS (WHERE NECESSARY). NOT ALL EQUIPMENT SHOWN IS SUPPLIED AS STANDARD AND CONTENTS WILL VARY DEPENDING ON PACKABOCCE MODEL PURCHASED.

BEFORE USING PACKABOCCE COURTS, PLEASE READ ALL ASSEMBLY AND CARE AND MAINTENANCE INSTRUCTION

WARNINGS AND CARE GUIDE – PLEASE READ BEFORE USE

- Bocce court bag contents are HEAVY and therefore care should be taken when transporting /lifting bags.
- Never drag the inflated/deflated bocce court on hard ground as IT WILL damage the hoses that make up the court.
- ONLY use the hand pump provided to inflate courts as high pressure mechanical appliances can damage hoses and/or valves and cause injury.
- Make sure you extract the residual air with hand pump before rolling Bocce Court back into the bag.
- Do not expose bocce court to chemicals such as thinner, gasoline or acetone.
- Do not use bocce court for other than temporary purposes nor leave exposed outside for prolonged periods of time. Exposure to adverse weather conditions and the suns ultraviolet rays can damage the Bocce Court and/or cause them to discolour.
- Do not use bocce court when they are frozen nor in overly windy conditions as this could damage courts and/or cause injury.
- Do not store your bocce court wet or dirty (even for short periods of time) in the carry bag.
- Always use a carry bag for transportation and storing bocce court.
- Do not force zip when packing bocce court as this can cause damage and put undue strain on the bag causing it to tear.
- Do not stand, walk, jump on or drop full body weight on bocce court especially when deflated.
- Inflate bocce court on even ground and, if required, only use recommended fixings to secure.
- Keep bocce court products away from open flames and any sharp objects.
- Failure to completely follow these guidelines could damage your bocce court, cause personal injury and void your Warranty.

PLEASE NOTE THAT PACKAWORLD PRODUCTS ARE TEMPORARY STRUCTURES AND NOT SUITABLE FOR LONG TERM EXPOSURE OUTDOORS. OVER A PERIOD OF TIME THE INFLATABLE FRAMES WILL LOSE AIR AND AS SUCH WILL REQUIRE TOPPING UP WITH THE PUMP SUPPLIED.

SET UP INSTRUCTIONS

PACKA BOCCE

All bocce courts comprise of a base, two walls and velcro straps (to attach the walls to the base). On the larger models the base unit will come in two parts and may include a gate section to accommodate wheel chair access. In addition, a two way double action pump is supplied to inflate the court.

(IMPORTANT NOTE - Only use the hand pump provided to inflate courts as high pressure mechanical appliances can damage hoses and/or valves and cause injury).

1

A- Remove all parts from the bag and lay out the court on a smooth, flat area ensuring there are NO TWISTS in the hose.

B- Arrange base to form the frame as shown in fig 1.

C- Undo dust caps from valves and check valves are closed (by turning valve toggle anti-clockwise) before inflating. This prevents air escaping during the inflating process. See fig 2.

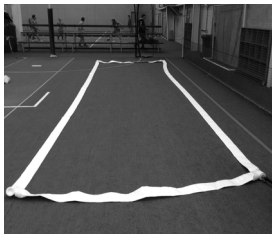

fig 1.

fig 2.

fig 3.

fig 4.

D- Attach the pump hose to the bottom valve of the pump fig 3. and inflate all parts provided.

E- It is important to screw dust caps back to the valves as this prevents damage to internal valve mechanism fig 4.

2

A- Lay inflated end walls on top of base frame as shown in fig 5.

B- Use velcro straps to affix walls making sure to attach 2 x straps tight at each corner shown in fig 6. Space remaining straps evenly along the sides and ends and secure tightly (NOTE: Strap numbers vary depending on bocce court model).

PACK AWAY INSTRUCTIONS

PACKA BOCCE

1

A- Remove all velcro straps and any ground fixings (if used).

B- To release air from frame & walls first remove the dust caps and open the valve by twisting it clockwise. See fig 7.

C- To begin deflating gently press the valve toggle in and wiggle until air starts to release.

D- Allow air to escape then extract all residual air as follows:

a) Move the hose to the top connector of the pump. See fig 8.

b). Place pump hose into valve and pump. See fig 9.

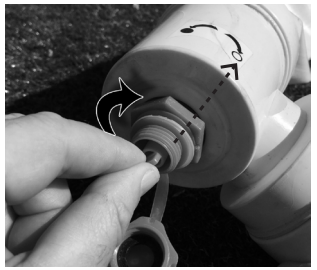

fig 7.

fig 8.

fig 9.

2

A- Once all air is extracted, start to fold the walls and base of court ensuring there are no twists as shown in fig 10. and fig 11. (NOTE - Keep pump hose connected as this prevents air rushing back into hose making it difficult to fold.)

B- Roll up base court tightly as shown in fig 12.

C- Once base court is rolled up tightly, remove pump from valve, lock valve by rotating anti-clockwise and replace the dust cap. See fig 13.

D- Repeat process for bocce court walls. See fig 14.

E- Pack court parts, pump, straps and any additional fixings into the bag(s) supplied. See fig 15.
