

FLOOR MOUNT NETWORK RACKS

Elixir Rack's ERFM Series **Floor Mount Rack** is a thoughtfully engineered, high-performance enclosure designed to deliver exceptional functionality, durability and flexibility. Manufactured from premium-grade steel sheets through precision punching, forming and welding processes, each rack is finished with a superior-quality powder coating for enhanced protection and a refined appearance.

Produced under stringent ISO manufacturing and quality management standards, the ERFM Series ensures consistent performance and dependable quality. Ideally suited for data centres, server rooms, LAN & WAN networks, telecom and networking applications, these robust floor-standing enclosures provide a secure, flexible and professionally organised solution for housing servers, switches, patch panels, UPS systems and other networking equipment.
