

IP 65 OUTDOOR RACK

The Elixir IP65 Outdoor Racks are specially designed to provide secure and organised housing for critical networking equipment. Their IP65-rated enclosure offers complete protection against dust and safeguards sensitive components from low-pressure water jets in outdoor environments.

A durable metal body and secure locking system ensure long-term safety and reliability. With efficient cable management and flexible wall and pole mounting options, it is a dependable solution for modern outdoor networking installations.

FEATURES

- Complies with DIN 41494 and all 19" international standards
