LiCONiC Information Update

StoreX Next Generation Technology

iSeries

Product Enhancement Package

*i*Series Overview

With the new *i*Series enhancement package, LiCONiC advances further ahead in its position at the leading edge of the technology. The new *i*Series offers unique new features which incorporates both, ideas from existing users and latest achievements by LiCONiC's applications and development groups. LiCONiC R&D succeeded in carefully embedding the new features in the existing well proven technology, without compromising its renowned reliability, thus ensuring an extremely high quality implementation. The *i*Series package greatly enhances LiCONiC's products and provides the users with greater overall performance and stability which results in superior assay performance.

LED Rainbow Technology
Instant and evident display of system status. Particularly useful in combination with integrated robotic application.

Graphical User Interface (GUI)
The most powerful interface of its kind. Displays sample-, climate-, system- and diagnosis-data.

*i*Motion - Fast & Intelligent Speed
Speed is important, so is gentle handling of samples; *i*Motion now does both. The intelligent speed control automatically optimizes for best performance.

Compact Design
Complete plug 'n play system which means all is included for instant operation. Identical dimensions regardless of option package.

Proven Cassette Design
Superior temperature stability in samples and optimum temperature homogeneity result in minimum edge effects and lowest evaporation rate.

High Quality Gas IR Technology
Most accurate and fastest gas control in the industry now based on 2nd generation sensor.

Enhanced High Speed Barcode Reading
The fastest and most reliable bar code reading method ever. Ultra-stable readings by novel stop-and-go motion.

Safe Erase Decontamination*
Proven technology, safe on electronics and safe on the robotics. Not heat based, thus the best solution for automation.

nWay Decontamination Suite*
Offers the best contamination prevention: Liconel in critical areas, humidity injection and easy access for effective cleaning.

Humidity Injection
Eliminates the contamination source in the water pan.

Freely Programmable Alarms
Configurable alarms for all options, including temperature, humidity, CO2 etc..

*) Optional feature
