

## COMPANY OVERVIEW

Cloud Catalogs LLC provides cleared IT staff augmentation to Tier-1 federal prime contractors supporting U.S. federal agencies. The company holds a Secret facility clearance granted by DCSA and can sponsor clearances for placed personnel.

Delivery is founder-direct. No recruiter layer, no hand-offs. The founder owns every step personally, backed by 12+ years developing inside a Tier-1 federal prime. A pre-screened bench puts qualified candidates out in hours, not days.

## SOURCE → VET → TECH SCREEN → SUBMIT → SUPPORT

*Every step run by the founder. Vetting covers background and clearance-feasibility; support continues through the life of the contract.*

## CORE COMPETENCIES

- Cleared IT staff augmentation under federal prime subcontracts
- Application development staffing — Java, .NET, web
- Cloud and platform staffing — AWS, Salesforce, Appian
- ERP and procurement systems staffing — SAP Ariba, Coupa, Oracle DBA
- Security clearance sponsorship (Secret) for placed personnel
- Short-notice and surge requisition fulfillment

*Bench coverage expands to meet prime requirements on request.*

## DIFFERENTIATORS

**Secret facility clearance with sponsorship capability.** The FCL permits sponsoring eligible candidates, so the qualified pool is not limited to already-cleared hires — widening supply on cleared requisitions.

**Founder-direct delivery, no recruiter layer.** One accountable owner from first contact through contract end — no hand-offs, no account-manager churn, and none of the overhead a recruiting layer adds.

**Bench vetted before requisition release.** Technical screening, background checks, and clearance-feasibility review are completed in advance, compressing time-to-submit from days to hours.

**Right-to-represent executed before every submission.** No unauthorized submissions and no duplicate-candidate conflicts for the prime.

## PAST PERFORMANCE

### Federal procurement catalog applications

Two federal agencies | in production

Designed and developed by the founder; both systems remain in production use today. Agency identification, contract references, and period of performance furnished on request.

Cloud Catalogs originated as a software product company, and the founder built these systems hands-on. That same engineering depth is applied directly to every candidate screen, rather than matching resume keywords.

## CORPORATE DATA

|            |                                 |
