

Find Your Role and See How CENTEGIX® Impacts You

Safety & Security

Every person on every campus in every building must be able to get help in an emergency.

CENTEGIX Helps You:

- Reduce incident response time
- Increase situational awareness
- Improve safety planning

Superintendents & Leadership

There's an important connection between feeling safe and being able to teach and learn effectively.

CENTEGIX Helps You:

- Empower staff to get help anywhere on campus
- Access usage and alert data for actionable insights
- Improve your schools' culture of safety
- Support staff retention and recruitment efforts

Educators

Those in charge of instruction have unique insights vital to safety planning.

CENTEGIX Helps You:

- Resume instruction quickly by accelerating incident response
- Create a safe, supportive classroom learning environment

Facilities & Operations

Facilities and assets must be up-to-date, functional, and accessible in an emergency.

CENTEGIX Helps You:

- Maintain and utilize a digital view of campus and building resources
- Add or update critical safety information on buildings and safety assets as needed
- Get rid of questionable version control and increase asset management efficiency

Human Resources

Safety plays a critical role in educator satisfaction and well-being.

CENTEGIX Helps You:

- Improve educator retention and recruitment
- Demonstrate support for staff

IT

Part of protecting schools is protecting their data and the technology tools they use everyday.

CENTEGIX Helps You:

- Leverage and extend capabilities of existing technology and resources
- Eliminate reliance on Wi-Fi or cellular service for alerts

CENTEGIX SAFETY PLATFORM®: ALERT TYPES

99% everyday safety incidents

1% campus-wide lockdowns

Hear from Impacted Stakeholders

Safety & Security

"Our previous mobile app didn't work because there were simply too many places on campus where the service was unavailable. We switched to CENTEGIX because there was nothing else that compared in terms of complete campus coverage and ease of use."

Frank Frangella, Chief of Safety and Security,
Martin County School District, FL

Superintendents & Leadership

"Seconds matter, and in a crisis, we're not always thinking clearly. CENTEGIX was able to put information out immediately. It issued the alert, told us it was a lockdown, and we executed the protocols. There was no time for miscommunication...Everybody knew what to do, and they were able to spend more time focusing on the response instead of the communication...You cannot put a price tag on safety. You're going to pay one way or another. You can pay in a financial investment or pay in a traumatic experience."

Dr. Craig Lockhart, Superintendent,
Valdosta City Schools, GA

Facilities

"The system has a very sophisticated mapping feature that allows responders to see exactly which room or hallway the emergency is coming from and from whom. In the event of a real active shooter, we could share this information with outside police agencies who may be coming to aid us."

Paul Cordova, Police Chief,
Aldine ISD, TX

"First responders need to know exact locations and what they're arriving to. They need to know where the resources are...they need to know what tools and equipment to deploy when they arrive at an emergency."

Jeri Williams, Former Phoenix Chief of Police,
CENTEGIX Education Advisory Board Member

CENTEGIX® is the industry leader of wearable safety technology for K12, protecting more than 18 million people. Leaders in over 18,000 locations nationwide trust CENTEGIX's innovative safety solutions to empower and protect people (every day).

Operations

"The minute we receive a map in an architectural drawing or PDF is the minute it is out of date! If I have to call an architect or vendor to update maps, I waste time and money. CENTEGIX's Safety Blueprint is the best of both worlds: we can make updates in real-time, and we don't have to spend money every time we make a change, like consolidating rooms or adding a mobile classroom. The assessment management and inventory management capability is icing on the cake."

Chris Farkas, Chief Operations Officer,
Hillsborough County Public Schools, FL

Instruction

"Thanks to the CrisisAlert data, we were able to identify the need and make the case to our Board to invest in areas that needed help. A year later, our CrisisAlert data demonstrated the effectiveness of the changes we made."

Tom Parker, Director of Middle and Secondary
Instruction & CTAE Director,
Jefferson City School District, GA

Human Resources

"Workplace safety [is the] number one issue not only for the schools but also throughout the nation, so this gives an extra level of security for our staff members."

Frank Stanage, Human Resources Director,
Alamo Heights ISD, TX
