

How is Oska Different?

1) Fully Wearable

- No disposables... no gels, leads, wires, etc.
- Does not need to be applied directly to the skin to work

2) Ease of Use

- 1-button push start, 2 hour charge time
- Can be used anywhere on the body
- Boosts patient compliance

3) Effective Treatment Radius

- 22 inch diameter treatment area extending in all directions from the device

4) One Time Purchase

- The device is not a rental
- 1 PO allows for the Provider to treat multiple patients for the same price

5) Focused PEMF Frequencies

- During each 3 hour session, Oska Pulse rotates through 4 frequencies targeting pain, inflammation, fibroblasts, & osteoblasts

Oska Mechanism of Action

- Clinical studies show the **most effective frequencies for treatment** range between **1Hz and 200Hz**.
- Oska Pulse uses **four treatment programs** that target the full joint structure — collagen, cartilage, and the supporting cellular structure.
- A special program **supports bone density** and **reduces nerve activity**, helping block pain signals to the brain.
- The shape, width, strength, and timing of each pulse are designed for **optimal therapeutic effect**.
- **Treatment covers the neck through ankles** and includes a vascular component that reduces inflammation and speeds recovery.
