

Total Cost Comparison (All-In) for Pain Management Devices

Device	Device Cost	Consults	Admin Cost	Consumable Cost	All-In Cost (\$)
OskaPulse	1,500	1	100	0	1,600
Alpha-Stim	1,200	4	400	600	2,200
BioWave	1,700	4	400	900	3,000
H-Wave	2,000	4	400	600	3,000
Neurolumen	3,500	4	400	600	4,500
RS-4i	5,000	5	500	600	6,100
Ortho Core	5,000	5	500	0	5,500
SamSport	8,000	4	400	800	9,200
Relieve	10,000	2	200	400	10,600
Replexa	18,000	9	900	0	18,900

Note on Costs: Costs reflect device acquisition (or typical monthly rentals), estimated prescription processing burden (\$100 per consult), and required consumables over a typical treatment period. Figures are rounded for comparative planning and are approximate.

Implications for Prosthetics Providers: Minimizing Workload and Cost

The data highlights key drivers of total cost and administrative burden:

- **Increased Workload:** Devices requiring multiple consults significantly increase prescription volume and administrative staff touchpoints.
- **Higher Long-Term Costs:** Consumables materially increase the total, long-term cost of treatment beyond the initial device acquisition price.
- **Oska Pulse Advantage:** Oska Pulse offers the lowest *All-In Cost* by minimizing required renewals, eliminating consumables, and reducing staff touchpoints to a single consult.
