AUTOPILOT NOT COPILOT

The most cost-effective order, built in seconds.

Non-stock included, sourced automatically, without missing the delivery date.

The problem

95%

of your orders never touch your webstore

They arrive however your customer wants to send them. Revalgo reads them anyway.

TIME TO ENTER ONE ORDER

Today	18 min
With Revalgo	1 min

What you get

Grow without adding headcount.

80% of orders flow straight into your ERP untouched, within 30 days of launch.

Cheapest way to fulfill, every time.

Prices each line off last paid or ERP price, then builds the order the cheapest way that still hits the delivery date.

Say yes to non-stock.

Sources from your suppliers automatically, instead of your team chasing it one call at a time.

Single-tenant.

Trained on your data alone, not the industry's. Your pricing and customer history stay yours.

Accepts any format

Email · PDF · Excel · Handwriting · Fax · Voice · Counter

RUNS ON THE ERP YOU HAVE ALREADY

infor · EPICOR · NETSUITE · SAP · sage · Acumatica The Cloud ERP · Microsoft Dynamics 365

+ every other major distribution ERP

How it works

01 Capture

Reads the order from any format, any channel.

02 Interpret

Resolves plain-English descriptions with no part numbers, converts units of measure, and backfills missing information.

03 Build

Prices each line, checks availability in your warehouses, and sources non-stock from your suppliers.

04 Confirm

The complete order lands in your ERP. Arrives at 11pm, built by 11:02.

One customer | Year 1

$6 billion
in orders processed on the platform

4,000
salespeople live on the system

99.9%
accuracy on partial part numbers

Figures reflect a single Revalgo customer's first year, a top-5 global electrical distributor. Platform-wide totals are higher.

Your team never leaves Outlook.

Orders are processed inside the inbox they already live in.
