

DOUBLE SIDED

LIFT DOOR

Spartherm's double sided wood fire – for the ultimate fireplace experience. Double sided glass gives you twice the benefits.

The large firebox allows for a lot of wood, giving you a generous flame and the highest heat output of all Spartherm fireplaces. The lift door, with its unique lifting hide away glass system, is a high end feature of the double sided wood fire.

DOUBLE SIDED

LIFT DOOR

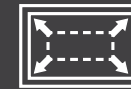

CLEAN AIR APPROVED

NZ Nelson authorisation number 0046

HIDEAWAY LIFT DOOR

Utilising unique patented technology, we created an easy-to-slide lift door which effortlessly glides upwards into the wall.

MAXIMISED FLAME VIEW

By combining a large glass front and slim edges, our Spartherm wood fires have the maximum amount of flame for your viewing pleasure.

POWERFUL HEAT

With large fireboxes and an efficient heat distribution system, Spartherm wood fires kick out an estimated peak heat output of 28kW.

Viewable Glass Size	394 H x 853 W (mm)
