

CORNER

LIFT DOOR

With its unconventional two sides, the corner wood fire is modern and edgy. Available in both right and left side variations, it provides an interesting way to connect two living spaces, perfect for open plan homes.

Like all Spartherm fireplaces, the glass viewing area is large to ensure the flames are the focus. Maximum heat output is 24kW with a clean burning heat efficiency of 65.9%.

CORNER

LIFT DOOR

CLEAN AIR APPROVED

NZ: ECAN authorisation number 168071 (LH) 168072 (RH)

HIDEAWAY LIFT DOOR

Utilising unique patented technology, we created an easy-to-slide lift door which effortlessly glides upwards into the wall.

MAXIMISED FLAME VIEW

By combining a large glass front and slim edges, our Spartherm wood fires have the maximum amount of flame for your viewing pleasure.

POWERFUL HEAT

With large fireboxes and an efficient heat distribution system, Spartherm wood fires kick out an estimated peak heat output of 24kW.

Viewable Glass Size	441 H x 773 W x 381 D (mm)
