Independent breathing-air supply where space matters

TRACY is a stand-alone breathing-air unit that operates independently of ambient air. Two 140 litre cylinders at 300 bar provide a stated capacity of 70,000 litres for two users. Units can be stacked where site space is limited.

TECHNICAL DATA

Maximum users	2 persons
Connections	2 x double-secured CEJN 3/8 quick coupling
Breathing-air capacity	400 litre/min
Line pressure	Min. 6.5 / max. 10 bar
Breathing-air quality	NEN EN 12021 / DIN 3188
Max. cylinder pressure	300 bar
Capacity 300 to 50 bar	70,000 litre
Capacity after alarm at 50 bar	10,000 litre

SIR class	B2
Ambient temperature	-10 / +40 °C at max. flow
Alarm <= 50 bar	Acoustic
Earth cable	Yes
Central lifting point	Yes
Dimensions (W x L x H)	161 x 338 x 111 cm
Undercarriage	Single axle or skid frame
Registration	Optional
