Call Medcor for Work-Related Injury

NOTE: There are two versions of this poster – one for California and one for all other states.

Little Caesars has partnered with MEDCOR®, a triage call center that is available to all Little Caesars corporate stores 24/7. This reporting system not only gathers pertinent information for immediate medical assistance/recommendation to an injured worker, but assists in providing valuable documentation to the Risk Management department.

Reporting an incident to MEDCOR immediately following an injury, illness or life threatening medical emergency not only helps the employee with their injury, but also documents the incident accurately. The information reported allows the Risk Management team to follow up with store management, the colleague and the health care provider. It also ensures our company stay in compliance with State/Federal guidelines.

Please review the Little Caesars Injury Response and Reporting Procedures. It is important that all in-store crew members are familiar with the response and reporting procedure. All steps are to be followed. Instructions are available in English and Spanish. Stores located in California MUST include a signed DWC I form.
