

AI strategy, implementation & enablement

We help organizations move from AI curiosity to AI capability — deliberately, safely, and at a pace their staff can actually absorb. We design governed knowledge tools, AI agents, and compliance-grade query systems grounded in your own institutional knowledge, and build the habits and guardrails that make adoption stick.

01

AI strategy & readiness

Discovery, vendor-neutral platform evaluation, and phased roadmaps sequenced to deliver value without overcommitting budget.

02

Governed knowledge repositories

Structured, curated repositories built for AI retrieval — reducing hallucination risk and grounding every answer in vetted source material.

03

AI agents & internal query tools

Chat-based agents, compliance query tools, and document synthesis — always positioned as a draft for expert review, never a final output.

04

Workforce capability building

Mapping real (not stated) AI usage patterns among pilot staff, and turning them into repeatable, governed workflows.

05

Vendor & technology advisory

Independent, vendor-neutral evaluation of AI platforms and tools — informing procurement without conflicts of interest.

06

Ongoing strategic AI counsel

Executive-level decision support on AI risk, governance, and where to extend AI capabilities externally.

How we work

Foundation before automation. Pilot before scale. Draft, not final. Organizational readiness has to keep pace with tool delivery — so we build governed knowledge structure before layering on agents, prove approaches with a small number of real users before scaling, and operate as a retained, embedded extension of your technology leadership rather than a one-time drop.

Vendor-neutral

Recommendations aren't tied to any single AI platform or cloud provider.

Fractional & right-sized

Senior-level AI strategy without the cost of a full-time hire.

Adoption that sticks

We pair AI build-out with the change management that makes it actually happen.

Let's talk about what AI-ready looks like for your organization.
