

Technology consulting & fractional CIO services

Senior-level IT strategy and governance, delivered as a right-sized engagement. We give your organization access to experienced technology leadership and decision-making — without the overhead of a full-time executive hire.

What we do

- Technology roadmap development aligned to your mission and growth stage
- IT governance, risk management, and vendor oversight
- Digital transformation planning and change management
- Staff technology enablement and capacity building
- Cybersecurity posture assessments and policy development
- Board-ready technology reporting and strategic advising

What this looks like in practice

- Guided migration from legacy on-premise phone systems to a scalable, cloud-based VOIP platform — cutting cost and adding remote-work flexibility
- Renegotiated existing software contracts, generating meaningful savings on recurring technology spend
- Evaluated MSP help desk offerings and streamlined support delivery, closing service gaps
- Documented onboarding, offboarding, and access-review procedures across HR and banking systems

Nonprofit-first mindset

Every solution is shaped by lean teams, tight budgets, and donor accountability.

Technology agnostic

We recommend what fits your goals — never a vendor relationship or product bias.

Fractional. Flexible. Affordable.

CIO-level expertise, right-sized to your organization's stage and budget.

Collaboration begins with a conversation.
