PROVIDER CATALOGUE

A practical guide to preliminary technical assistance providers
across 18 service categories

ASCENT Project Preparation Facility

Version 0.8 | Published 20 August 2026

Hosted by the COMESA Secretariat

Cover photo: Biel Morro / Unsplash

About the ASCENT Project Preparation Facility

The Accelerating Sustainable and Clean Energy Access Transformation (ASCENT) Project Preparation Facility (PPF) helps public agencies and private-sector project sponsors advance distributed renewable energy and clean-cooking initiatives towards investment readiness. The Facility is funded by the World Bank Group and hosted within the COMESA Secretariat's Project Implementation Unit. Cygnum Capital serves as PPF Manager, working with COMESA and the World Bank Group on the Facility's design, operationalisation and administration.

The PPF addresses a persistent project-preparation gap by connecting eligible applicants with targeted expertise that can strengthen technical design, commercial viability, operational performance, safeguards, financing readiness and implementation planning. Support is demand-driven and may be delivered through different windows for companies, national agencies and regional or cross-border initiatives.

Purpose of this catalogue

This catalogue helps companies and government agencies understand the available service categories and make an informed provider preference when requesting technical assistance. It summarises each provider's relevant capability, approved working languages and reported permanent presence. A stated preference helps the PPF understand an applicant's needs, but does not guarantee appointment of that provider; matching and engagement remain subject to eligibility, scope, availability, due diligence, contracting and the applicable PPF procedures.

Working edition and future updates

Version 0.8 is a pre-publication working edition. The first approved public edition will be Version 1.0. Some selected providers are not currently listed because further information is awaited for their inclusion. The roster was initially populated through a competitive selection process conducted in July–August 2026 and remains open; providers or categories may be added, removed or updated as support needs, contracting, availability, demand, performance and programme priorities evolve.

IMPORTANT All service providers in this edition are preliminary selections. Inclusion is subject to successful completion of contracting and does not constitute a guarantee of assignment, endorsement, exclusivity or future availability.

Before expressing a provider preference

- Confirm that the requested support fits the applicable service category and current application window.
- Describe the problem to be solved, expected outputs, timing, location and any required language or on-the-ground presence.
- Review more than one relevant provider where possible and explain the practical reasons for a preference.
- Check the latest ASCENT PPF guidance for eligibility, co-financing, documentation and submission requirements, which may vary by support window.

Current programme information: ascent.comesa.int/project-preparation-facility-ppf

How to Use This Catalogue

Start with the category index, select the service area that best matches the support required, and follow the linked category code to its chapter. Category descriptions and indicative support areas explain the types of assistance available within each service area. Within every category, providers are listed alphabetically by service-provider name; this order does not indicate ranking, evaluation score or preference. Provider names, category codes and the 'Also listed' field are clickable in the PDF, making it easy to move between related profiles.

Profile field	What it tells you
Provider name / logo	The selected organisation or individual and the mark supplied with its application.
Provider overview	A concise description of the provider's wider organisation, experience and operating model.
Category capability	The expertise and proposed offer most relevant to the category shown on that profile.
Languages	Working languages approved for the category; confirm assignment-specific needs during matching.
Key personnel	Named experts proposed to lead or support work under that category.
Geographic experience	A two-colour map distinguishing permanent presence from reported project delivery experience.
Online / also listed	A website or professional profile, plus linked category codes for the provider's other listings.

Reading the Maps

	Permanent presence - registered office or resident team (darker category colour)
	Project experience - assignments reported in the application (lighter category colour)
	No recorded activity; eligible countries remain visible in a neutral tint

Shortlisting

Compare technical fit, key personnel, languages, geographic experience and practical delivery needs. Where an assignment spans several categories, use 'Also listed' to review the same provider's related capabilities before stating a preference.

Category index

Use the three-digit code to locate a category chapter. Counts show the preliminary providers currently profiled in this edition. Providers within each chapter are ordered alphabetically by service-provider name, not by application number or ranking.

Code	Category	No.	Code	Category	No.
001	Pre-feasibility, Feasibility and Investment-Grade Technical Studies	5	010	Environmental, Social, Health and Safety (ESHS) Advisory and Due Diligence	2
002	Market Assessments, Demand Studies and Geospatial Planning	3	011	Gender, Inclusion and Workforce Development	3
003	Product and Technology Piloting, Validation and Market Entry Support	2	012	Impact Measurement, ESG and Sustainability Reporting	0
004	Financial Modelling, Business Planning and Investment Readiness	7	013	Carbon Finance, Environmental Attributes and Impact Monetisation	3
005	Transaction Advisory, Legal and Commercial Structuring	6	014	Capacity Building, Training and Knowledge Products	6
006	Transaction Execution and Financial Close Support	5	015	Catalytic Finance, RBF and Grant Funding Support	5
007	Digitalisation, MIS, Data Systems and Analytics	4	016	Policy, Regulatory and Tariff Advisory	5
008	Credit Risk Management and PAYGo Analytics	2	017	Operations, Maintenance, Asset Management and Circular Economy Support	2
009	Interim Management and Embedded Operational Support	4	018	Productive Use of Energy (PUE) Strategy, Piloting and Scale-Up	3

Pre-feasibility, Feasibility and Investment-Grade Technical Studies

5 preliminary providers

What this category covers

This category encompasses the preparation of high-quality technical, commercial, and investment-grade studies for DRE and clean cooking projects and businesses. The purpose is to establish a credible evidence base for project design, technical risk assessment, financing discussions and investment decisions. Assignments may combine pre-feasibility and feasibility studies and technical system design and optimisation with technical due diligence and project preparation support, with the precise scope tailored to the applicant's needs, maturity and intended outputs.

Indicative support areas

- pre-feasibility and feasibility studies
- technical system design and optimisation
- resource assessments
- load forecasting
- site assessments
- investment-grade studies
- technical due diligence; and
- project preparation support

Azimut 360 S.C.CL.

PRELIMINARY ROSTER SELECTION / CONTRACTING IN PROGRESS

azimut360
 engineering • sustainability • development

PROFILE

Azimut 360 is a non-profit engineering cooperative specialising in distributed renewable energy and rural electrification. Founded in Barcelona in 2009, the organisation has a team of 40 professionals and more than 25 years of combined experience...

CATEGORY CAPABILITY

Azimut 360 provides end-to-end feasibility and investment-grade technical advisory for distributed renewable energy and electrification projects, combining engineering expertise with economic, financial and implementation analysis.

KEY PERSONNEL Mireia GIL SANCHEZ - International Consultant and Engineer; Pol ARRANZ-PIERA - International Consultant and Engineer; Daniel Cadilla Falcó - International Consultant and Engineer

Market Assessments, Demand Studies and Geospatial Planning

3 preliminary providers

What this category covers

This category encompasses market intelligence generation, customer and demand analysis, geospatial planning, and market expansion strategy development. The work should turn market, customer and location data into practical decisions on targeting, rollout sequencing and market expansion. Assignments may combine market assessments and geospatial analysis with market entry strategy and ecosystem mapping, with the precise scope tailored to the applicant's needs, maturity and intended outputs.

Indicative support areas

- market assessments
- geospatial analysis
- customer segmentation
- rollout planning
- demand forecasting
- competitive landscape analysis
- market entry strategy; and
- ecosystem mapping

Product and Technology Piloting, Validation and Market Entry Support

2 preliminary providers

What this category covers

This category encompasses product piloting, technology validation, commercial testing, and market entry activities. The focus is on testing whether a product or technology works for its intended users and market before wider commercial deployment. Assignments may combine product-market fit analysis and pilot design and implementation with consumer adoption analysis and market expansion support, with the precise scope tailored to the applicant's needs, maturity and intended outputs.

Indicative support areas

- product-market fit analysis
- pilot design and implementation
- technology validation
- supplier and product due diligence
- commercial rollout support
- consumer adoption analysis; and
- market expansion support

Productive Use of Energy (PUE) Strategy, Piloting and Scale-Up

3 preliminary providers

What this category covers

This category encompasses productive use of energy initiatives linked to income generation and commercial sustainability. The objective is to connect energy access with productive activities that raise utilisation, incomes and local economic value. Assignments may combine PUE strategy development and pilot implementation with cold chain applications and commercial scale-up support, with the precise scope tailored to the applicant's needs, maturity and intended outputs.

Indicative support areas

- PUE strategy development
- pilot implementation
- agricultural and SME energy applications
- demand stimulation
- productive-use business models
- cold chain applications; and
- commercial scale-up support

EED Advisory Limited

PRELIMINARY ROSTER SELECTION / CONTRACTING IN PROGRESS

PROFILE

EED Advisory Limited is a Pan-African consulting firm providing advisory, technical, and analytical services in energy access, distributed renewable energy, clean cooking, productive use of energy, climate finance, and energy-sector policy and regulation.

CATEGORY CAPABILITY

EED Advisory advances energy access by connecting electricity use with enterprise growth, rural livelihoods and local market development. Across Africa, we have assessed productive-use technologies, MSME demand, supplier ecosystems, affordability, financing needs and opportunities to stimulate...

Notes and disclaimer

Status, provider preference and matching

Version 0.8 is a pre-publication working edition. Providers have been selected for the categories shown but remain subject to completion of contracting and applicable checks. Applicants may identify and explain a preference, but final matching may take account of scope, technical fit, language, location, availability, conflicts, budget, procurement and contracting requirements. Inclusion does not guarantee an assignment, confer exclusivity or constitute endorsement of every service offered.

Information and updates

Provider descriptions, personnel and geographic information are based on provider-supplied application material and may not be independently verified. Logos are provider-supplied or, where necessary, sourced from the provider's official website. Categories, profiles and availability may change through contracting or later programme decisions. Applicants should use the latest approved catalogue and programme guidance, and confirm material requirements during the support process. Cover photography was sourced from the Cygnum Capital website and is credited to Biel Morro / Unsplash.
