CoreWeave | VAST

Powering the Future of AI

CoreWeave Cloud: The Essential Cloud For AI

50+ global data centers

Platinum Rating for SemiAnalysis ClusterMAX™

Multiple GPU models to select from for diverse workloads

3.5 GW+
Total Contracted Power

Growth Over the Years

2023	2024	2025	2026
10 PB+ across 2 data centers	**350 PB+** across 14 data centers	**500 PB+** across 19 data centers	**1 EB+** across 32+ data centers

Core Benefits

- **Modular Scaling:** Scale compute and storage independently
- **Fast Deployment:** Spin up GPU/CPU clusters in minutes
- **AI-Scale Ready:** All-flash, zero-copy architecture, flexible deployment of GPUs
- **Max GPU Utilization:** No idle cycles—VAST feeds GPUs at full speed
- **No Bottlenecks:** Optimized for training, inference, and simulation
- **Unified Data Access:** One platform for file, object, and structured data

"Some of the most data-intensive and computationally advanced customers on the planet trust CoreWeave and VAST to deliver the most secure and scalable solutions on top of the industry's fastest and most flexible AI infrastructure."

Michael Intrator
CEO and Co-Founder, CoreWeave
