

Turn the AI Vulnerability Tsunami into Remediation Action Plans

Hackuity is the **Vulnerability Operations Platform** that unifies exposure across **assets** and **vulnerabilities**, helping security teams prioritize remediation and reduce cyber risk.

■ WHY NOW

AI finds vulnerabilities faster than ever. That doesn't make prioritization obsolete. **It makes it critical.**

AI is multiplying findings.

More sources, more duplicates, more noise. Teams spend too much time sorting instead of fixing.

Exploitation windows are collapsing.

CVSS alone can't tell you what to fix first or what poses the greatest risk.

Attackers use AI too.

Attackers and defenders both use AI. Faster remediation is what ultimately makes the difference.

■ WHY A VULNERABILITY OPERATIONS CENTER

AGGREGATE & DEDUPLICATE

Hackuity centralizes, normalizes, and deduplicates findings from **130+ security tools** into **one actionable view**, helping teams cut through the noise and focus on what needs action.

ENRICH & PRIORITIZE

Go beyond CVSS with **Hackuity's True Risk Score**, combining **threat intelligence**, **exploitability**, **asset exposure**, and **business context** to identify what poses the greatest risk and what to fix first.

AUTOMATE & ORCHESTRATE

Automate **remediation workflows**, route vulnerabilities to the right owners, and connect security and production teams around **clear priorities, SLAs, and actions**.

REPORT & MEASURE

Track risk, remediation progress, ownership, and verified closure in one view. **Measure security outcomes** and turn vulnerability operations and compliance into a continuous, accountable process.

100%

of your vulnerabilities and assets centralized, normalized, and deduplicated

3x

faster remediation for critical patches

99.9%

reduction in false positives caused by scanners

How Hackuity orchestrates your vulnerability operations

Full Cloud

On-Prem

MSSP Ready

Multi-tenant by design

1

Aggregate & Deduplicate

Unify vulnerabilities & assets

2

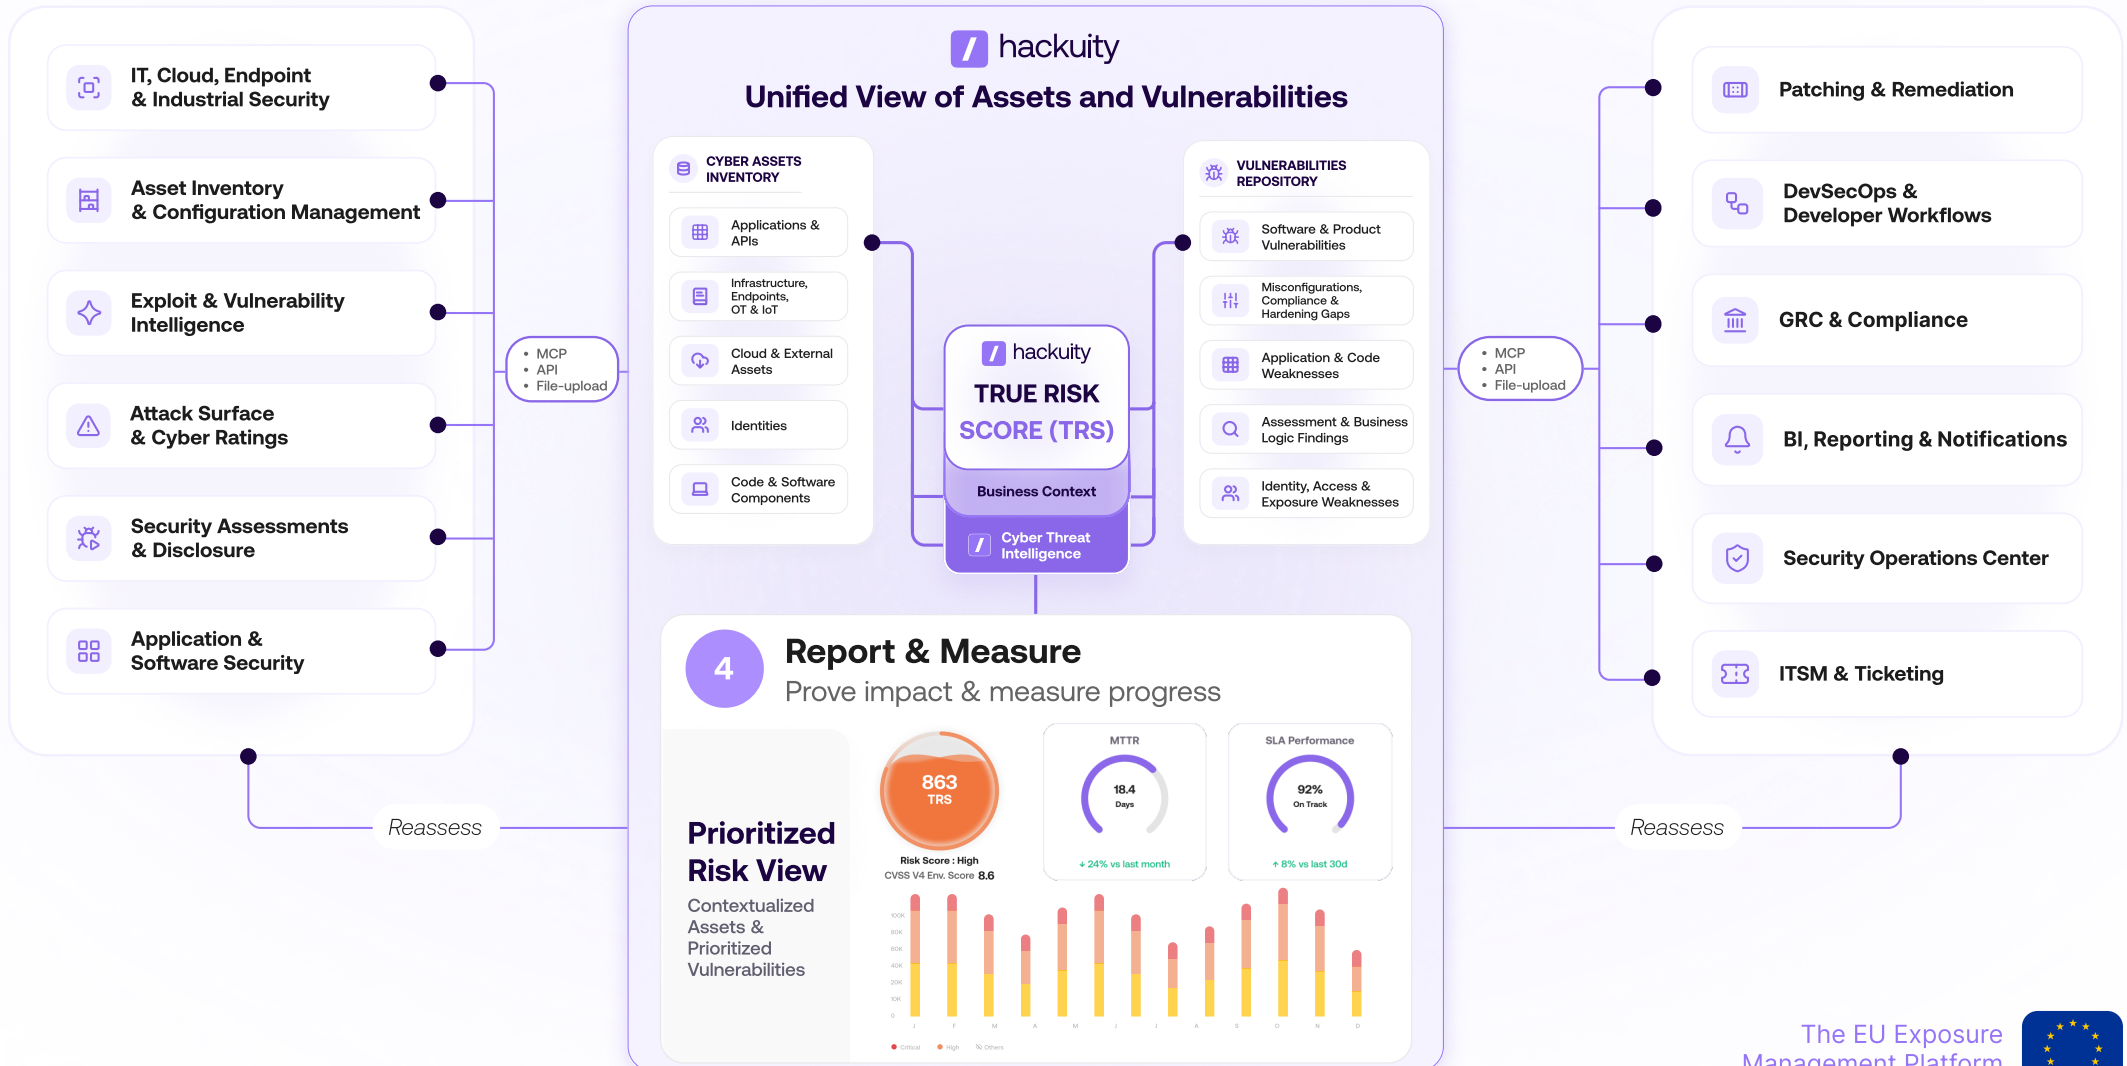

Enrich & Prioritize

Focus on the vulnerabilities that matter most

3

Automate & Orchestrate

Remediation tools & workflows

The EU Exposure Management Platform
