it's time to apply your sensor

let's get started

Before you start, read the safety information in the Instruction Booklet in your kit.

This guide shows you how to:

1. prep inside of forearm
2. remove base
3. apply sensor
4. apply cover

For video instructions:

video.abbottdiabetes.com

1 prep inside of forearm

- Shave any hair
- Clean with alcohol wipe or soap and water
- Dry completely before application
- Do not apply on irritated or damaged skin
- Do not use lotions, creams and sunscreen before or after application

2 remove base

Do not use if damaged
Do not use if the base is already released

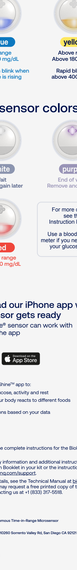

3 apply sensor

4 apply cover

Find cover and remove packaging

White light will blink for 2 hours while sensor is getting ready

tap twice for glucose

Turns on lights for up to 30 seconds

Note: Lights will turn back on if there is a change in your glucose range or sensor status

your glucose colors

other sensor colors

For more details, see the Instruction Booklet.

Use a blood glucose meter if you need to know your glucose level.

Download our iPhone app while your sensor gets ready

Biolinq Shine® sensor can work with or without the app

Download on the App Store

Use the Biolinq Shine™ app to:

- Track your glucose, activity and rest
- Learn how your body reacts to different foods and activities
- Get suggestions based on your data

These are not the complete instructions for the Biolinq Shine® System.
