Environmental Policy

The Management of Dangote Cement South Africa (DCSA), view continuous improvement of company processes and protection of the natural environment as essential factors for standing out in the highly complex and competitive cement manufacturing industry.

Dangote Cement South Africa (DCSA) is committed to the implementation of an Environmental Management System and will always ensure that the contents are implemented, maintained, and understood by all personnel throughout the company.

The Dangote Cement South Africa Environmental Objectives are to:

- **Lower carbon emissions by implementing our decarbonisation roadmap**
- **Conserve water resources** by minimizing water usage across all operations.
- **Enhance energy efficiency** by reducing energy consumption.
- **Manage waste responsibly,** aiming to eliminate waste going to landfills through optimized waste management strategies.
- **Promote biodiversity** by supporting initiatives for ecosystem preservation and rehabilitation efforts.
- **Ensure cleaner air quality** by adopting practices that improve and maintain healthy air standards.
- **Uphold our environmental licenses** by remaining compliant with all regulations and maintaining our commitment to sustainable operation.

Dangote Cement South Africa Committed to:

- Develop, implement, and maintain an Environmental Management System with a focus on continuous improvement.
- Continually seek opportunities to establish longstanding mutually beneficial relationships with our stakeholders.
- Support the environmental management initiatives driven by DCP and Top Management, ensuring all business aspects and impacts are identified and task-related risk assessments are regularly carried out.
- Ensure that all employees are adequately equipped and trained to perform their duties in a professional manner.
- Ensure that all personnel are aware of and follow the company-agreed policies, procedures, and processes in maintaining the Environmental Management System at all times.
- Determine that measurable environmental objectives are identified for all relevant functions and levels of the organisation.
- Continually comply with all applicable Regulatory and Legislative requirements.
- Ensure implementation of the Environmental Management System aligns with strategic objectives at all times.
- Ensure the contents and intent of this policy are communicated to all employees and stakeholders regularly, as documented in our communication plan.
- The Environmental Policy will be reviewed annually for adequacy and suitability during Management Review meetings.
