

VECTRA VR-100 SERIES

Bottom Roll Mirror Closet Sliding Door System

MIRROR CLOSET SLIDING DOORS

TRACKS, PROFILES & ROLLER HARDWARE

The VECTRA VR-100 Series is a framed, bottom-roll bypass sliding door system for interior closets and wardrobes. Mirrored panels reflect light and provide a full-length view, while overlapping sliding doors save the floor space required by swing doors. Available in Silver, Black and White, with a choice of mirror thicknesses or a cardboard insert, the system pairs with wire shelving to create practical, organized storage.

TECHNICAL SPECIFICATIONS
