ATTN:MSDS COORDINATOR

Ashland provides its customers with a Material Safety Data Sheet (MSDS) the first time a product is purchased or sampled for testing. In some cases, an MSDS is distributed on an annual basis to comply with specific regulatory requirements even if there has been no revision. If the MSDS is significantly changed, a copy of the revised sheet is sent to customers who purchased the product in the previous twelve months.

The Material Safety Data Sheet is addressed to the attention of the MSDS COORDINATOR and is sent according to the contact information that Ashland has on file for your organization. You should direct the Material Safety Data Sheet to those responsible for managing or designing operations involving the use of the product and those who use or handle the product and may potentially be exposed to it.

Ashland is committed to providing accurate health and safety information on the products that we manufacture or distribute. We appreciate your continued business.

If you have any further questions or concerns, please feel free to contact us.
