Evolve Energy

Consolidated Segmental Statement

Basis of Preparation

Accounting Standards

The CSS for Evolve Energy Supply Ltd has been prepared in accordance with accounting standards (UK GAAP/FRS 102) applied in the financial statements for year ended 30 September 2025. Revenue and earnings (EBIT) in this CSS agree to these financial statements.

Definitions and Methodology

Revenue
Revenue from sale of electricity and gas: Comprises electricity and gas sales to non-domestic customers. Revenue is recognised on the basis of units supplied during the year.

Direct Fuel Costs
Includes wholesale electricity and gas costs, losses, balancing and shaping costs and power purchase agreements (PPAs).

The weighted average cost (WACOE/G) covers the wholesale energy cost.

Direct Costs

Transportation Costs

- Network transportation costs (TNUoS, DUoS).
- Balancing Services Use of System charges (BSUoS).

Environmental and social obligation costs

Primarily policy related costs relating to net zero and other schemes not limited to:

- Renewables Obligation (RO).
- Feed-in-Tariff (FiT).
- Contracts for Difference (CfD).
- Capacity Market costs.
- Green Gas Levy.
- Assistance for Areas with High Electricity Distribution Costs (AAHEDC)..
- REGOs

Other direct costs
- Broker costs and sales commissions directly attributable to sales.
- Market participation costs (Elexon, Xoserve).
- Smart metering programme costs.

Indirect Costs
- Sales and marketing.
- Credit insurance & debt recovery.
- Bad debt provisions.
- Customer service and billing.
- Central services and corporate recharges.
- IT, HR, property costs.
- Metering costs (including smart meter installations).

Indirect costs are allocated between segments using turnover.

Evolve Energy

Consolidated Segmental Statement

Basis of Preparation

Hedging Policy

- Evolve Energy does not engage in any speculative trading of volumes.
- For imbalance pass through contracts, customers bear the volume risk associated with variations in actual consumption relative to forecast usage. Energy is purchased on a pass-through basis, and any differences between forecast and actual consumption are reflected in customer charges.
- For tolerance contracts, consumption volumes can vary within an agreed percentage range. If customers anticipate a deviation beyond this tolerance band, they can request a reforecast. When actual volumes fall outside the contracted tolerance, the resulting variance is passed on to the customer - meaning Evolve does not carry the volume risk.

Volume and Pricing Metrics

- Volume: Supplier volumes at meter point (net of losses).
- WACOE/G: Direct fuel costs divided by volume
- Meter Points: Average number of MPANS/MPRNSs during the year, calculated by adding monthly closed meter points and dividing by 12.

Reconciliation to Statutory Accounts

This is not required as there are no reconciling items and Revenue, EBITDA and EBIT agree to the published financial statements of Evolve Energy Supply Ltd.

Glossary of Terms

EBITDA: Earnings before interest, tax, depreciation and amortisation
EBIT: Earnings before interest and tax
MPANS: Meter Point Administration Numbers (electricity)
MPRNS: Meter Point Reference Numbers (gas)
WACOE: Weighted average cost of electricity
WACOG: Weighted average cost of gas
TWh: Terawatt hours
m Therms: Million therms
BSUoS: Balancing Service Use of System
DUoS: Distribution Use of System
TNUoS: Transmission Network Use of System
RBD: Reconciliation by Difference
