Business Activities

AKUSTA Materials Ltd. is a materials-technology company specialising in the development and commercialisation of passive fire-protection solutions and flame-retardant material technologies.

Our activities include material and application development for injection moulding, thermoforming, sheet and film production, coated materials and customer-specific passive fire-protection solutions.

Responsibility for Website Content

AKUSTA Materials Ltd. makes reasonable efforts to ensure that information published on this website is accurate and current. Technical information, material properties, applications and test data are provided for general information only unless expressly confirmed in a separate written technical specification or agreement.

Individual material properties may vary depending on formulation, processing conditions, thickness, production method and application environment.

Intellectual Property

Unless otherwise stated, all text, graphics, product names, technical information, photographs, designs, logos and other website content are owned by or licensed to AKUSTA Materials Ltd. Reproduction, modification, distribution or commercial use without prior written permission is prohibited.

External Links

AKUSTA Materials Ltd. accepts no responsibility for the content, availability or data-protection practices of third-party websites linked from this website.

Technical Test Reports

Published summaries of laboratory results are intended to provide a general technical overview. Complete independent laboratory reports may be made available to customers during direct project discussions upon request.

A test result obtained for a specific specimen, formulation or thickness must not automatically be interpreted as applying to every product configuration or application.
