Secure Enclave Price List

Copyright © 2026 Analog Informatics Corporation. All rights reserved.

Secure enclave package with Analog Informatics Corporation (**AIC**) tools included - pre-configured enclave on cloud infrastructure (Microsoft Azure Commercial Cloud): private isolated network; secure gateway / Jump (session Connect broker / Jump host) to the Internet; Identity and Access Management (**IAM**) for the secure network. Fewer customer configuration choices than on-premises. Not a Cybersecurity Maturity Model Certification (**CMMC**) paper. For CMMC Level 1 / 2 / 3 packaging and the **on-premises** option (same Level packaging; deploy and IAM guidance; customer environment and choices remain), see the CMMC Solutions Price List.

Internal Managed Systems Count = count of systems inside the enclave (Security Technical Implementation Guide (**STIG**) image workstations and servers) that AIC manages (credentials, access, audited actions) under Privileged Identity Management (**PIM**), Privileged Access Management (**PAM**), and Privileged User Management (**PUM**) (**AIC-EP-INT**). **External Managed Systems** = systems outside that connect into the environment (**AIC-EP-EXT**). Jump = session Connect broker / Jump host capacity.

Paid commercial floor: **25** Internal Managed Systems.
