Compare what each approach does, then follow the detailed page for responsibilities and a matched quote. A hosted service, a cloud platform, and customer-operated software have different scopes.

AIC Package Reference

CUI email and file sharing, privileged credential vaulting, brokered sessions with command restriction, endpoint elevation, configuration compliance, training and attestation, and the Assessment Binder. The base kit includes 25 managed systems and the stated 25-person/user allowances; one FCI/CUI email account per named user is included; additional named users are $15 per user per month. Confirm other add-on quantities in your quote. Session Recording is included only in Level 3.

Current package prices, add-ons, and purchase terms are on AIC CMMC Complete™ Pricing. Cloud or hardware, ongoing administration, and independent assessment fees are separate.

Complete the Same Cost Worksheet

Ask both providers to price the same CUI boundary: 25 users with one included FCI/CUI email account per named user, 25 managed systems, and the same privileged administrators. Additional named users are $15 per user per month. Itemize software, hosting, setup, ongoing administration, assessment support, and existing licenses. A different user count or an unpublished price cannot establish which complete solution costs less.

Unlimited free migration assistance is delivered directly and in coordination with your staff, MSP, and solution providers. Your infrastructure, third-party products, independent assessment, and any separately agreed managed services remain separate costs.

Choose Your Next Step

Review the package entitlements, walk through your requirements, or ask us to scope a matched quote.
