

ATLAS TACTICAL™

ALL TERRAIN LOGISTICS AND TACTICAL SUPPORT VEHICLE

Supporting Missions from the Home Front to the Battlefield

The ND Defense ATLAS Tactical™ vehicle is a highly common, scalable, and modular family of vehicles that can handle the full spectrum of mission roles, from long-range highway logistics to navigating severe off-road trails. It brings commercial innovation to the battlefield to enable U.S. and allied nations to gain a competitive edge. The ATLAS Tactical™ vehicle combines proven common militarized platforms with advanced commercial technologies, resulting in superior capabilities at a lower cost.

Armored Protection Kit

When the situation warrants, the ATLAS Tactical™ vehicle can morph into an incredibly mobile, highly survivable, easily transportable, aggressive tactical vehicle that can handle the extremes of military missions, all while maintaining the commercial pedigree and all the sustainment benefits that come along with a mass-produced vehicle.

Vehicle Axle Configurations

The ATLAS Tactical™ chassis is highly scalable, which is ideal for a wide variety of missions. Whether carrying equipment or personnel, the ATLAS Tactical™ family of vehicles can be configured to suit your specific mobility and payload requirements.
