

cubus and cubus pure home entertainment

acoustics

The basis for optimal acoustics are elements made from pure natural wood.

room divider: optimum TV connection by means of pivoting chrome pillar

The optional stainless steel TV stand can almost be rotated a full 360° and comes with an integrated cable duct. This stand enables you to see the screen from any side of the room.

loudspeaker

Special interior partitioning offers sufficient space for all standard loudspeaker systems or centre speakers.

cable pull flap fitting

The special pull-out fittings have a slender, elegant appearance and ensure smooth closure of the flaps. When opened, the flaps are flush with the unit base.

cable management solution

The cable management system allows for well organised electric wiring hidden from sight. Access from above and a neat cable cut outs make it easy to navigate wires between units.

fronts

solid wood

coloured glass to wooden frame

loudspeaker fabric on frame

flaps

flap handle wood (only for wood front)

flap handle stainless steel or bronze matt for wood front

flap handle stainless steel or bronze matt for glass front

bases: recessed plinth or plinth pedestal

media drawer: solid wood or coloured glass

fan and cutout for docking station possible

A clever ventilation system prevents the equipment from overheating. An optional extra is the in-built electric fan, controlled via temperature sensors.

home entertainment with subwoofer | subwoofer cube

The subwoofer element is an elegant solution for storing subwoofers that would otherwise be freestanding within the room. The element is constructed in such a way that the subwoofer stands directly on the floor. This eliminates disruptive vibrations. The element can be integrated in a row of units or used as a free-standing piece.
