UNITED KINGDOM

FLGGD SAFELINE

# Ask before the money moves.

A scam check your customers reach by forwarding a text, under your bank's name. Nothing to install, and no integration with your core systems.

A customer forwards a text and gets a verdict. An illustration; the bank and the message are invented.

## THE PROBLEM

UK victims lost £450.7 million to authorised push payment scams in 2024 (UK Finance). Since October 2024, sending and receiving firms share most reimbursements, up to £85,000 a claim (PSR). Your fraud tools watch the money, not the text that comes first.

### Put the check where the scam arrives.

**TODAY**

- A customer gets a convincing text
- They act on it alone

**WITH FLGGD SAFELINE**

- They forward it to your number
- **A verdict with reasons, in seconds**
- They stop before anything is paid

## WHAT IS IN IT, AND FOR WHOM

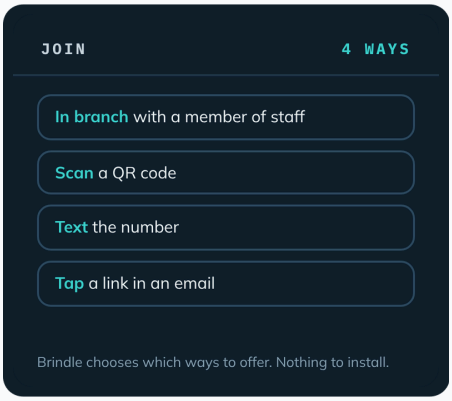

- **For your bank.** A customer service in your name, measured by what never arrives.
- **For your fraud team.** Somewhere to send every customer who asks "is this real?"
- **For your customers.** A second opinion by text, with nothing to install.
- **For you.** A launch your IT team does not have to build.

# FLGGD SAFELINE: HOW IT WORKS

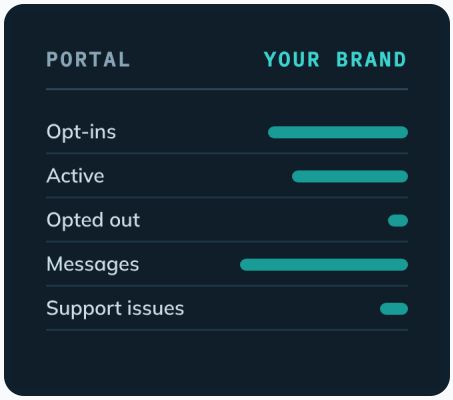

## 1 Customers join

In branch, by QR code, by text or by an email link. You choose which.

## 2 They forward a text

One of four flags comes back in plain language, with the reasons named.

## 3 Your team sees it

A portal shows enrolment, messages, verdicts and support issues.

### WHAT YOU SUPPLY

Your name, logo, colour and support link, and the places you will tell customers about it.

### WHAT FLGGD DOES

Runs the number, the verdicts and the portal. You can start on a shared number and move to one of your own as enrolment grows. Customers see no change when you do.

### YOUR REVIEW WILL ASK

**Data.** Consent is recorded with its source. STOP, START and HELP work on every number. Data is separated per institution.
**Integration.** None with the core. Customers forward a text to a number, and the portal needs no engineering to run.

**Control.** Every verdict is a Flggd verdict with its reasons, never a guarantee. SafeLine holds no payments and moves no money.

> **Every verdict is a Flggd verdict with its reasons, never a guarantee.** It learns from the scam, not from your customers.

**Try SafeLine with your own customers**
