UNITED STATES

FLGGD SAFELINE

Ask before the money moves.

A scam check your customers reach by forwarding a text, under your bank's name. Nothing to install, and no integration with the core.

A customer forwards a text and gets a verdict. An illustration; the bank and the message are invented.

THE PROBLEM

Americans lost $470 million to scams that started with a text in 2024, five times the 2020 figure (FTC). Every fraud tool your bank runs watches the money, not the text that comes first.

Put the check where the scam arrives.

TODAY

- A customer gets a convincing text
- They act on it alone

WITH FLGGD SAFELINE

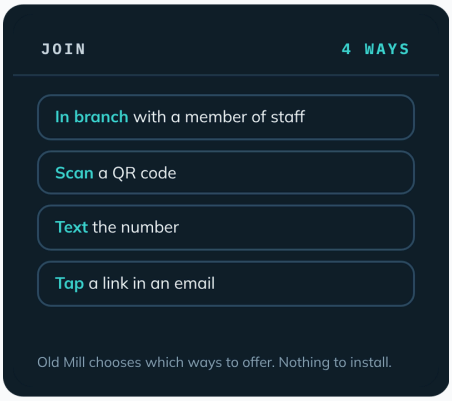

- They forward it to your number
- **A verdict with reasons, in seconds**
- They stop before anything is paid

WHAT IS IN IT, AND FOR WHOM

- **For your bank.** A service for the depositors who own it, in your name.
- **For your fraud team.** Somewhere to send every customer who asks "is this real?"
- **For your customers.** A second opinion by text, with nothing to install.
- **For you.** A launch your technology team does not have to build.

1 Customers join

In branch, by QR code, by text or by an email link. You choose which.

2 They forward a text

One of four flags comes back in plain language, with the reasons named.

3 Your team sees it

A portal shows enrollment, messages, verdicts and support issues.

WHAT YOU SUPPLY

Your name, logo, color and support link, and the places you will tell customers about it.

WHAT FLGGD DOES

Runs the number, the verdicts and the portal. You can start on a shared number and move to one of your own as enrollment grows. Customers see no change when you do.

YOUR REVIEW WILL ASK

Data. Consent is recorded with its source. STOP, START and HELP work on every number. Data is separated per institution.
Integration. None with the core. Customers forward a text to a number, and the portal needs no engineering to run.

Control. Every verdict is a Flggd verdict with its reasons, never a guarantee. SafeLine holds no payments and moves no money.

> **Every verdict is a Flggd verdict with its reasons, never a guarantee.** It learns from the scam, not from your customers.
