

District Name ISD Hazard Analysis Tool (TxSSC, 2002)

This hazard analysis tool was crafted by the Texas School Safety Center to be readily accessible to the average staff member within the school communities we serve. Our goal is accessibility for these school communities. Hazard analysis is ultimately a subjective process and can inform important decisions beyond emergency planning. This tool will give you a starting point with which to have further conversations about financial and emergency planning for the hazards that most impact your community. The original copy of this tool can be found on the TxSSC website (txssc.txstate.edu) in the Basic Plan Toolkit under the Tools tab.

We've assigned a range of values from 0-10 for each column. ***Districts may change the values to suit their local needs.***
