The British Blockchain Association's Response To FCA's Discussion Paper: DP25/1 - Regulating Cryptoasset activities

On behalf of The British Blockchain Association (BBA), I am pleased to submit our formal response to the FCA's Discussion ***Paper DP25/1, Regulating Cryptoasset Activities***. As one of the world's leading authorities on evidence-based blockchain and crypto policy, research, and education, BBA commends the FCA's commitment to engaging meaningfully with the industry, to shape a future-fit regulatory framework.

The British Blockchain Association's Response to FCA Consultation Paper CP25/14: Stablecoin Issuance and Cryptoasset Custody

I am pleased to submit our response to the FCA's Consultation Paper CP25/14 on Stablecoin Issuance and Cryptoasset Custody. The BBA, as the leading industry body advocating evidence-based blockchain and digital asset adoption in the UK, welcomes the opportunity to contribute to this important consultation. Our response reflects the BBA's commitment to fostering a regulatory environment that promotes consumer protection, market integrity, and financial stability while enabling innovation in the cryptoasset sector. I would like to thank our members, editors, advisors and partners for helping us draft this response.

Contributing to High-Impact Summits:

Speaking at The Commonwealth Roundtables

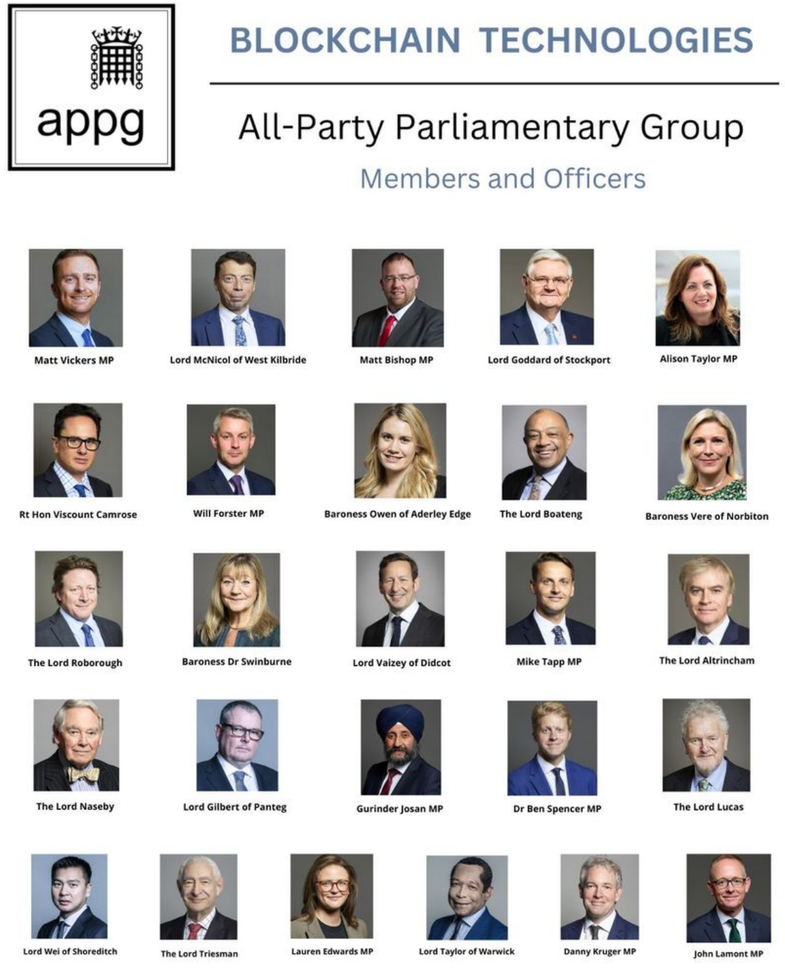
Worked closely with the Regulators:

Both in the UK, and Beyond

Strengthened relations with the Policymakers:

Re-launched Blockchain APPG in the new Parliament:

And grew it to 25+ MPs and Lords in just over 10 months



Received a Spotlight and Recognition from UK Government's Dept. for Business & Trade

Re: **A Blockchain-Based Digital Identity for the United Kingdom**

Dear Sir Keir,

Parliament is scheduled to debate, on 8 December 2025, a petition opposing the introduction of digital ID cards that has amassed widespread public support, and as of today, has garnered almost 3 million signatures [1]. As President of the British Blockchain Association, the UK's leading industry body advancing evidence-based adoption of Blockchain technologies, I am writing to ask whether the Government has considered a decentralised, privacy-preserving Digital Identity framework based on Distributed Ledger Technology and Zero-Knowledge Proofs. Given parliamentary debates on the risks of centralised digital ID systems, widespread public concern, and global best practices, a self-sovereign, citizen-controlled model could offer a secure, ethical, trusted, and future-proof path for the UK.
