

Roadmap implementation scorecard

Publication is a milestone. It does not, by itself, demonstrate funded delivery or public benefit. Review each dimension separately and attach dated evidence.

Suggested stage labels: Not assessed | Planned | Resourced | In delivery | Evaluated. Use Not applicable only with a reason. Missing evidence means unknown, not failure.

Dimension and evidence to seek	Stage / evidence reference
Mandate and ownership Documented sponsor, accountable delivery team and agreed scope.	Stage: _____ Evidence/date: _____ Owner: _____
Participation Evidence of consultation, user involvement and responses to concerns.	Stage: _____ Evidence/date: _____ Owner: _____
Evidence and prioritisation Baseline, alternatives considered and transparent use-case selection.	Stage: _____ Evidence/date: _____ Owner: _____
Resources and capability Confirmed funding, delivery capacity and skills plan.	Stage: _____ Evidence/date: _____ Owner: _____
Delivery and safeguards Pilot or service records; governance, security and privacy controls.	Stage: _____ Evidence/date: _____ Owner: _____
Outcomes and learning Measured results, independent scrutiny where appropriate and published lessons.	Stage: _____ Evidence/date: _____ Owner: _____

Review discipline

For every claimed result, record the indicator, baseline and date, target, observed result, source and limitations. Distinguish activity (such as workshops) from outcomes (such as a verified change in service performance). Record costs and unintended effects as well as benefits.

Do not total the stages into a national league table. A dimension may advance or regress; evaluated does not necessarily mean successful. Agree the next decision, owner and review date.
