

TALENT POOL

Computer Systems Validation Specialist

Montreal

(Pharmaceutical Industry)

Company Description

MONBEL Consultants Inc. is a boutique engineering consulting firm providing expert technical services to the pharmaceutical industry. Our diverse projects include engineering services, qualification & validation mandates, quality services in regulated environment as well as project management.

With a flexible business strategy, MONBEL ensures rapid resource mobilization and seamless execution to meet client needs.

Role Description

- This is full-time, permanent positions; based in Montreal, QC, with the flexibility of some remote work.
- As a Computerized Systems Validation Specialist, you will participate in start-up, qualification and validation projects to help our clients achieve desired compliance and efficiency.
- Computerized equipment and systems validation: software, custom made computerized equipment, full automated solutions
- Create and execute validation tests and protocols, analyze results, release systems and recommend path forward.
- Create and review quality documents related to the computerized systems (SOPs, CAPAs, deviations etc.).
- Conduct and manage small to medium validation & engineering projects in the pharmaceutical industry.
- Work in close collaboration with management, quality & compliance teams, and engineering departments.
- Other internal tasks may include marketing and business development support for MONBEL.

Qualifications

- University or technical degree in engineering, science, computer science, pharmacy, or equivalent - or equivalent work experience.
- 3-5 years minimum experience in validation / qualification roles in the pharmaceutical/biotechnology environment *covering computerized systems validation is a must*
- Bilingual French/English oral and written.
- Analytical spirit and problem solver.
- Quick learner and team player.
- Having own car is an advantage but not a must.
- Candidates must be based in Montreal, Quebec.

Come work with us

- Opportunity to work with a variety of clients in the pharmaceutical and biotechnology industry, including the latest state of the art biotechnology facilities in Quebec.
- Opportunity to work on interdisciplinary projects in engineering, validation and quality.
- Competitive salary
