QUALITY-BUILT ALTERNATORS

ENGINEERED FOR RELIABLE CHARGING

Engineered components support consistent electrical output, while end-of-line testing validates reliable on-vehicle charging performance.

TRIPLE TESTED

- SUBCOMPONENT TESTING
- IN-LINE TESTING
- END-OF-LINE TESTING

QB PREMIUM SERIES

- **100% New Bearings and Brushes:** Replacement of bearings and brushes ensure durability and long-life performance
- **Stator and Rotor Electrically Tested:** Ensures coil integrity and stator phase balance
- **Regulators Electrically Tested:** Ensures OE functionality
- **Rectifiers Electrically Tested:** Provides consistent phase balance and voltage drop
- **LIN/BSS Function Testing (Where Applicable):** Validates smart charging functions for OE compatibility
- **Precision-Machined Rotor Slip Rings:** Provides consistent current delivery for dependable output

QB BLACK SERIES

- **100% New Construction:** All-new components provide long service life and dependable charging
- **OE-Matched Fit, Form and Function:** Designed for direct-fit installation and OE-compatible operation
- **Precision Bearing Design:** Supports smooth operation, proper rotor alignment and long-life performance
- **Consistent Charging Output:** Provides dependable electrical output across changing vehicle loads and operating conditions
- **Advanced Voltage Regulation:** Maintains stable system voltage to support vehicle electronics and battery charging
- **LIN/BSS Function Testing (Where Applicable):** Validates smart charging functions for OE compatibility
