QUALITY-BUILT BRAKE BOOSTERS

RELIABLE POWER ASSIST

Pre-set OE-spec push rods, verified valves and threads, and corrosion-resistant protection help deliver smooth, consistent braking operation.

QB PREMIUM SERIES

- **Pre-Set Push Rod to OE Specifications:** Pre-set to match OE specifications, reducing the possibility of a soft pedal or brake drag
- **Verified Threads for Proper Installation:** Ensures out-of-the-box fit while reducing the possibility of cross-threading
- **Corrosion-Resistant Protective Coating:** Enhanced protection against moisture and corrosion, providing higher durability
- **Verified Valves for Consistent Operation:** Ensures proper pressure transfer and consistent operation, minimizing the possibility of leaks
- **Components Designed for OE Functionality:** Maintains the functional characteristics required for smooth, powerful braking
- **100% Individually End-of-Line Tested:** Rigorous testing ensures reliable performance

QB BLACK SERIES

- **100% New Construction:** All-new components provide long service life and dependable performance
- **Pre-Set Push Rod to OE Specifications:** Pre-set to match OE specifications, reducing the possibility of a soft pedal or brake drag
- **Verified Threads for Proper Installation:** Ensures out-of-the-box fit while reducing the possibility of cross-threading
- **Corrosion-Resistant Protective Coating:** Enhanced protection against moisture and corrosion, providing higher durability
- **Verified Valves for Consistent Operation:** Ensures proper pressure transfer and consistent operation, minimizing the possibility of leaks
- **Components Designed for OE-Required Functionality:** Maintains the functional characteristics required for smooth, powerful braking
