BLACK SERIES BRAKE PADS

ENGINEERED FOR HIGH-DEMAND DRIVING

Black Series brake pads pair stabilized friction material with OE-matched design for smooth, reliable braking and superior performance. Engineered to reduce noise, vibration and dust, they feature corrosion-resistant hardware for proper pad engagement and hassle-free installation.

- **Scorched Friction Material:** Removes volatile organic compounds to bring material to its stabilized operating condition
- **Multi-Layer Shims Engineered to OE Requirements:** Engineered to minimize noise, vibration, and harshness (NVH)
- **OE-Matched Slots and Chamfers:** Matched to OEM design to optimize reduction of vibration and harmonics
- **Stainless-Steel Hardware Included:** Corrosion-resistant hardware, ensuring proper pad engagement and functionality
- **Precision-Cut Backing Plates for OE Fit:** Ensures proper fit for hassle-free installation
- **OE-Matched Advanced Friction Formulations:** Provides superior, OE-matched performance with virtually no noise or dust

	QB STANDARD SERIES	QB PREMIUM SERIES	QB BLACK SERIES
Best for	Daily commuting and budget-conscious drivers	All-weather daily driving and comfort-focused drivers	Performance driving and enthusiast builds
Braking feel	Smooth, reliable stopping	Smooth, quiet, refined response	Sharp, aggressive bite with progressive control
Noise	Low	Very low (noise-reducing shims)	Very low (multi-layer shims + slots and chamfers)
Dust	Low	Very low	Ultra-low
Driving style	City and commuting	City, highway and all-weather	Performance, spirited and high-demand driving
Hardware	Included where required	Stainless steel, included where applicable	Application-specific stainless steel hardware

STANDARD SERIES BRAKE PADS

RESPONSIVE BRAKING POWER FOR EVERYDAY DRIVING

Standard Series brake pads combine dependable friction materials with multi-layer shims and OE-matched slots and chamfers that alter pad and rotor engagement harmonics to reduce noise, vibration, and harshness.

- **Reliable Friction Formulations:**
  Dependable friction materials for reliable braking performance
- **Multi-Layer Noise-Reducing Shims:**
  Engineered to reduce noise
- **OE-Matched Slots and Chamfers:**
  Matched to OEM design to optimize reduction of vibration and harmonics

PREMIUM SERIES BRAKE PADS

SUPERIOR BRAKING PERFORMANCE

Premium Series brake pads are engineered for enhanced performance across everyday driving conditions. Multi-layer shims and OE-matched slots and chamfers help reduce noise, vibration and harmonics, while providing smooth braking with minimal residue for cleaner wheels.

- **Premium Friction Formulations:** Provides enhanced performance with minimal noise and dust
- **Precision-Cut Backing Plates for OE Fit:** Ensures hassle-free installation
- **OE-Matched Slots and Chamfers:** Matched to OEM design to optimize reduction of vibration and harmonics
- **Scorched Friction Material:** Removes volatile organic compounds to bring material to its stabilized operating condition
- **Stainless-Steel Hardware Included:** Corrosion-resistant hardware, ensuring proper pad engagement and functionality
- **Multi-Layer Shims Engineered to OE Requirements:** Engineered to minimize noise, vibration and harshness (NVH)

WORK FORCE SERIES BRAKE PADS

ENGINEERED FOR DEMANDING CONDITIONS

Work Force Series brake pads provide reliable stopping performance and fade resistance. OE-matched design minimizes noise, vibration and harshness, while stabilized friction material and corrosion-resistant hardware support consistent operation and proper pad engagement.

- **Stainless-Steel Hardware Included:** Corrosion-resistant hardware, ensuring proper pad engagement and functionality
- **OE-Matched Slots and Chamfers:** Matched OEM design reduces vibration and harmonics
- **Multi-Layer Shims Engineered to OE Requirements:** Engineered to minimize noise, vibration, and harshness (NVH)
- **Scorched Friction Material:** Removes volatile organic compounds to bring material to its stabilized operating condition
- **Precision-Cut Backing Plates for OE Fit:** Ensures hassle-free installation
- **Heavy-Duty Friction Formulations:** Engineered for high-energy braking conditions, delivering superior stopping power and exceptional fade resistance

	QB PREMIUM SERIES	QB WORK FORCE SERIES
Best for	All-weather daily driving and comfort-focused drivers	Heavy-duty, fleet and commercial vehicles
Material	Ceramic, copper-free formulation	Specialized semi-metallic compound
Driving style	City, highway and all-weather	Work trucks, hauling, towing and frequent stops
Braking feel	Smooth, quiet, refined response	Tough, consistent stopping under heavy loads
Heat tolerance	Enhanced for daily driving conditions	Engineered for extreme heat and high-pressure stops
Best suited for	Sedans, SUVs and passenger vehicles	Trucks, fleet and off-road vehicles
