QUALITY-BUILT BRAKE ROTORS

ENGINEERED FOR SMOOTH, EVEN BRAKING

OE-style vane designs promote efficient heat dissipation, while its mill-balanced construction and G11H18 metallurgy help reduce vibration and resist warping and cracking.

QB BLACK SERIES

- **Corrosion-Resistant Coating:** Fully coated protection maximizes service life
- **OE-Style Vane Design for Heat Dissipation:** Matches original vane patterns, providing efficient heat dissipation
- **Mill-Balanced for Smooth, Even Performance:** Provides even wear and reduction of wheel vibration
- **G11H18 High-Strength Metallurgy:** Superior tensile strength and high resistance to warping and cracking
